

**FREE CASH \$2.7 MILLION HIGHER THAN PRIOR YEAR
STRONG VOLUME IN THE SUGAR SEGMENT
ACQUISITION OF DECACER COMPLEMENTS MAPLE SYRUP PORTFOLIO ACQUIRED IN FISCAL 2017**

During the quarter, Rogers Sugar Inc. (the “Company”) expanded its operational capabilities and maple syrup product offering with the acquisition of another maple syrup bottler, securing a global leadership position in the maple syrup industry. On November 18, 2017, the Company acquired from the Levasseur Family 100% of 9020-2292 Québec Inc. (“Decacer”), a company operated under the “Decacer” trade name for approximately \$40.0 million, in addition to closing adjustments of approximately \$3.0 million. Decacer has one bottling plant in Dégelis, Québec. This acquisition, combined with the earlier acquisition of LBMT, allows us to create a solid platform and to broaden the Company’s maple syrup operations and expand its product offering, including a unique maple sugar dehydration technology as well as enhancing the potential for additional operational synergies. The acquisition was funded by a drawdown under the Company’s existing \$275.0 million revolving credit facility, which was subsequently increased by \$40.0 million to \$315.0 million on December 20, 2017.

As a result of the acquisition of LBMT and Decacer, the Company now has the following two operating segments: Sugar and Maple products.

Sugar

The industrial market segment decreased by approximately 1,000 metric tonnes for the quarter, mostly due to timing in sugar deliveries, while the consumer volume increased for the current quarter by approximately 300 metric tonnes compared to the same period last year. Liquid volume ended the period at approximately 3,800 metric tonnes higher than the first quarter of last year. The increase is explained by additional demand from existing customers and liquid sugar deliveries of a high fructose corn syrup (“HFCS”) substitutable customer in Western Canada for the full quarter of fiscal 2018 as opposed to two months in the first quarter of fiscal 2017. Exports increased by approximately 2,700 metric tonnes for the current quarter due to timing in deliveries of the Canada specific U.S. quota and Mexico sales, as well as additional U.S. high tier opportunistic sales versus the comparative period last year.

With the mark-to-market of all derivative financial instruments and embedded derivatives in non-financial instruments at the end of each reporting period, our accounting income does not represent a complete understanding of factors and trends affecting the business. Consistent with previous reporting, we prepared adjusted gross margin and adjusted earnings results to reflect the performance of the Company during the period without the impact of the mark-to-market of derivative financial instruments and embedded derivatives in non-financial instruments. Earnings before interest and income taxes (“EBIT”) for the Sugar segment included a mark-to-market gain of \$4.8 million for the first quarter which was deducted to calculate adjusted EBIT and adjusted gross margin results. See “Non-GAAP measures” section in the MD&A.

Adjusted gross margin for the quarter was \$31.2 million compared to \$29.1 million for the same quarter last year, representing an increase of \$2.1 million. Included in adjusted gross margin is a non-cash pension plan income of \$1.5 million recorded as a result of the approval by the Alberta Treasury Board and Finance of an amendment to the Alberta hourly pension plan. Excluding this non-cash income, adjusted gross margin was \$29.7 million or \$0.6 million higher than last year, mostly due to higher sales volume, somewhat offset by additional operating expenses, such as higher energy costs associated to the new carbon tax in Alberta, higher maintenance costs, due to timing and to consulting fees incurred relating to air emission reduction initiatives in Taber. Adjusted gross margin rate was \$179.19 per metric tonne or \$170.70 per metric

tonne, when excluding the non-cash pension plan income of \$8.49 per metric tonne, and as a result, adjusted gross margin decreased by \$2.22 per metric tonne versus the first quarter of fiscal 2017. The decrease is due mainly to the additional operating expenses explained above.

Administration and selling expenses for the first quarter of fiscal 2018 were \$0.3 million lower than the comparable period last year mostly explained by a reduction in employee benefits.

Adjusted results from operating activities for the first quarter of \$23.8 million were \$2.3 million higher than the comparable period year. The increase is mainly due to the non-cash pension plan income, higher sales volume and lower administrative and selling expenses, somewhat offset by additional operating expenses, mainly in Taber, as explained above.

Maple products

Revenues for the first quarter include revenues generated by Decacer since its acquisition on November 18, 2017.

Gross margin of \$7.1 million for the quarter does not reflect the economic margin of the Maple products segment, as it includes a gain of \$1.0 million for the mark-to-market of derivative financial instruments on foreign exchange contracts. The mark-to-market gain was deducted to calculate adjusted EBITDA and adjusted gross margin results. See “Non-GAAP measures” section in the MD&A.

In addition to the impact of the mark-to-market adjustment for derivative instruments, the acquisition by LBMT of Decacer has resulted in expenses that do not reflect the economic performance of the operation of LBMT. Finally, certain non-cash items and non-recurring expenses also had a negative impact on the results from operating activities. As such Management believes that the Maple products segment’s financial results are more meaningful to management, investors, analysts, and any other interested parties when financial results are adjusted for the above mentioned items. See “Non-GAAP measures” section in the MD&A. Maple products Adjusted EBITDA is defined as the earnings before interest expenses, taxes and depreciation and amortization expenses of the Maple products segment, adjusted for the total adjustment to cost of sales relating to its segment and non-recurring expenses.

Adjusted gross margin for the quarter was \$6.1 million, representing an adjusted gross margin percentage of 12.4%. However, included in cost of sales, is an amount of \$0.3 million due to an increase in value of the finished goods inventory at the date of acquisition of Decacer. Under IFRS, all inventory of finished goods upon acquisition is valued at the estimated selling price less the sum of the costs of disposal, and a reasonable profit allowance for the selling effort of the acquirer which results in, lower selling margins when the acquired inventory is sold. As at December 30, 2017, there was no finished goods inventory remaining that existed as at the acquisition date. Without this adjustment, adjusted gross margin would have been \$6.4 million or 13.0% of revenues.

Administration and selling expenses of \$3.2 million include \$0.7 million in consulting fees and other costs incurred as a result of the acquisition of Decacer and \$0.3 million in non-recurring costs representing severance costs accrued to date.

Distribution expenses were \$0.8 million for the period.

The results of operations would therefore need to be adjusted by the following:

		December 30, 2017
Results from operating activities	\$	3,041
Total adjustment to cost of sales ^{(1) (2)}		(987)
Adjusted results from operating activities		2,054
Non-recurring expenses:		
Acquisition costs incurred		710
Other non-recurring items		254
Finished goods valued at the estimated selling price less disposal cost as of acquisition date		261
Depreciation and amortization		923
LBMT Adjusted EBITDA ^{(1) (2)}	\$	4,202

⁽¹⁾ See "Non-GAAP measures" section.

⁽²⁾ See "Adjusted results" within the unaudited condensed consolidated interim operating results section and "Segmented information" section of the MD&A.

Other non-recurring items represent severance costs accrued to date.

Consolidated

Adjusted gross margin for the quarter was \$37.3 million versus \$29.1 million for the comparable period last year. During the current quarter, LBMT and Decacer contributed \$6.1 million of adjusted gross margin. The remainder of the positive adjusted gross margin variation is attributable to the Sugar segment and was explained above in the Sugar segment section.

Adjusted EBIT for the first quarter of fiscal 2018 was \$25.9 million compared to \$21.5 million, an increase of \$4.4 million. The increase in adjusted gross margin of \$8.2 million was partly offset by higher administration and selling expenses as well as distribution costs when compared to the comparable period, due mainly to LBMT and Decacer's administrative and selling expenses and distribution costs of \$4.0 million for the quarter. Included in the current quarter's administrative and selling expenses of the Maple product segment is \$0.7 million in acquisition costs incurred related to Decacer. Without the acquisition costs, adjusted EBIT was \$26.6 million, an increase of \$5.1 million versus the comparable period last year.

The Decacer acquisition was funded from a drawdown under the revolving credit facility.

Net finance costs for the quarter were \$1.7 million higher than the comparable period of last year, excluding the amortization of the transitional balance, due to the increased borrowings under the revolving credit facility, the increase in interest rates during the fourth quarter of fiscal 2017 and additional interest payable by LBMT to the *Fédération des Producteurs Acéricoles du Québec* ("FPAQ") on syrup purchases.

Free cash flow for the first quarter of 2018 was \$17.4 million compared to \$14.7 million for the same period last year, an increase of \$2.7 million. The increase is mainly explained by an increase in adjusted EBITDA, net of the non-cash pension income (See "Non-GAAP measures" section in the MD&A) of \$3.7 million as well as a decrease in income taxes paid of \$2.8 million. Offsetting a portion of the positive variance is an increase in interest paid of \$1.4 million, higher capital expenditures,

net of operational excellence capital expenditures of \$1.3 million and an increase in pension plan contributions of \$0.6 million. Also, an amount of \$0.4 million was received during the first quarter of fiscal 2017 following the exercise of share options by executives, compared to none in the current period. Finally, the Company paid \$0.1 million in deferred financing charges during the current quarter to amend the revolving credit facility.

Outlook

In fiscal 2018, we expect the industrial market segment to decrease slightly, while the consumer volume should be comparable to fiscal 2017.

The liquid market segment should continue to be strong, benefitting from some growth with existing customers, the recapture of some of the volume loss in fiscal 2017 and the benefit of a full year of supply to a large bottler account in Western Canada. As a result, we expect the liquid market segment to surpass fiscal 2017 by approximately 10,000 metric tonnes.

As for the export segment, total volume is anticipated to increase by approximately 5,000 metric tonnes due to additional sales to Mexico and U.S. high tier opportunistic sales.

Overall, we expect total volume to increase by approximately 10,000 metric tonnes.

In fiscal 2018, the Company will benefit from a full year of operations of LBMT. As previously presented in the short form prospectus dated July 21, 2017, we expect LBMT's Adjusted EBITDA (See "Non-GAAP measures" section of the MD&A) to approximate \$18.4 million, which includes an increase in sales volume and related selling margins in addition to some operational efficiency gains for a total of approximately \$2.9 million. Management does not expect LBMT's Adjusted EBITDA to vary significantly, although it could be slightly lower than anticipated. Integration gains related to internal operational synergies have been revalidated and are expected to be well established in the second half of the fiscal year but are slightly delayed from our original targets. Anticipated commercial gains have been generally positive but some evidence of more competitive responses to new market growth has developed. In addition, Management expects non-recurring expenses of approximately \$1.0 million related to severance costs. In fiscal 2019, we expect additional integration gains of approximately \$2.1 million to be fully realized by the end of fiscal 2019. Therefore, fiscal 2019 Adjusted EBITDA for LBMT should amount to approximately \$20.5 million assuming the realization of all expected integration gains.

On November 20, 2017, the Company announced the acquisition of Decacer for \$40.0 million, subject to post-closing adjustments. Decacer's Adjusted pro forma EBITDA (See "Non-GAAP measures" section) on an annual basis is estimated at \$5.1 million. This acquisition, combined with the earlier acquisition of LBMT, allows us to create a solid platform and to broaden the Company's maple syrup operations and expand its product offering, including a unique maple sugar dehydration technology as well as enhancing the potential for additional operational synergies.

We expect energy costs to increase by approximately \$1.5 million in fiscal 2018 as a result of the implementation of the carbon tax in Alberta on January 1, 2017. The current carbon tax amounts to \$1.011 per gigajoule and will increase to \$1.517 per gigajoule on January 1, 2018.

Capital expenditures for fiscal 2018 are expected to increase compared to fiscal 2017 as the Company intends to spend approximately \$6.0 million on operational excellence capital projects. The Company is currently evaluating various scenarios in order to be fully compliant on air emission standards for the 2019 beet harvesting season and a decision is expected next quarter. To achieve this objective, the Company expects to undertake significant capital expenditure for this project, starting in the second half of the fiscal year. Early estimates of the net investment required to remediate the non-compliance range between \$15 million and \$25 million.

The beet slicing campaign is expected to be completed in late February. We expect that the current crop should derive approximately 125,000 metric tonnes of refined sugar.

Total pension plan expense is expected to decrease by approximately \$2.4 million in fiscal 2018 as a result of the increase in discount rates, as well as to the approval by the Alberta Treasury Board and Finance of an amendment to the Alberta Hourly Plan.

As a result of the acquisition of LBMT and Decacer, as well as the recent increase in interest rate and expectations of further increases by the Bank of Canada in fiscal 2018, we anticipate higher interest expense when compared to fiscal 2017.

FOR THE BOARD OF DIRECTORS,

Dallas H. Ross, Chairman
Vancouver, British Columbia – February 1, 2018

This Management's Discussion and Analysis ("MD&A") of Rogers Sugar Inc.'s ("Rogers", "RSI" or the "Company") dated February 1, 2018 should be read in conjunction with the unaudited condensed consolidated interim financial statements and related notes for the period ended December 30, 2017, as well as the audited consolidated financial statements and MD&A for the year ended September 30, 2017. The quarterly unaudited condensed consolidated interim financial statements and any amounts shown in this MD&A were not reviewed nor audited by our external auditors.

Management is responsible for preparing the MD&A. This MD&A has been reviewed and approved by the Audit Committee of Rogers and its Board of Directors.

NON-GAAP MEASURES

In analyzing results, we supplement the use of financial measures that are calculated and presented in accordance with IFRS with a number of non-GAAP financial measures. A non-GAAP financial measure is a numerical measure of a company's performance, financial position or cash flow that excludes (includes) amounts, or is subject to adjustments that have the effect of excluding (including) amounts, that are included (excluded) in most directly comparable measures calculated and presented in accordance with IFRS. Non-GAAP financial measures are not standardized; therefore, it may not be possible to compare these financial measures with the non-GAAP financial measures of other companies having the same or similar businesses. We strongly encourage investors to review the unaudited consolidated financial statements and publicly filed reports in their entirety, and not to rely on any single financial measure.

We use these non-GAAP financial measures in addition to, and in conjunction with, results presented in accordance with IFRS. These non-GAAP financial measures reflect an additional way of viewing aspects of the operations that, when viewed with the IFRS results and the accompanying reconciliations to corresponding IFRS financial measures, may provide a more complete understanding of factors and trends affecting our business.

The following is a description of the non-GAAP measures used by the Company in the MD&A:

- Adjusted gross margin is defined as gross margin adjusted for:
 - "the adjustment to cost of sales", which comprises of the mark-to-market gains or losses on sugar futures, foreign exchange forward contracts and embedded derivatives as shown in the notes to the unaudited condensed consolidated interim financial statements and the cumulative timing differences as a result of mark-to-market gains or losses on sugar futures, foreign exchange forward contracts and embedded derivatives as described below; and
 - "the amortization of transitional balance to cost of sales for cash flow hedges", which is the transitional marked-to-market balance of the natural gas futures outstanding as of October 1, 2016 amortized over time based on their respective settlement date until all existing natural gas futures have expired, as shown in the notes to the consolidated financial statements.
- Adjusted EBIT is defined as EBIT adjusted for the adjustment to cost of sales, the amortization of transitional balances to cost of sales for cash flow hedges.
- Adjusted EBITDA is defined as adjusted EBIT adjusted to add back depreciation and amortization expenses.
- Adjusted net earnings is defined as net earnings adjusted for the adjustment to cost of sales, the amortization of transitional balances to cost of sales for cash flow hedges, the amortization of transitional balance to net finance costs and the income tax impact on these adjustments. Amortization of transitional balance to net finance costs is defined as the transitional marked-to-market balance of the interest rate swaps outstanding as of October 1, 2016, amortized over time based on their respective settlement date until all existing interest rate swaps agreements have

expired, as shown in the notes to the unaudited condensed consolidated interim financial statements.

- Adjusted gross margin rate per MT is defined as adjusted gross margin of the Sugar segment divided by the sales volume of the Sugar segment.
- Adjusted gross margin percentage is defined as the adjusted gross margin of the Maple segment divided by the revenues generated by the Maple product segment.
- Adjusted net earnings per share is defined as adjusted net earnings divided by the weighted average number of shares outstanding.
- Maple products segment Adjusted EBITDA is defined as the earnings before interest expenses, taxes and depreciation and amortization expenses of the Maple products segment, adjusted for the total adjustment to cost of sales relating to its segment and non-recurring expenses.
- LBMT's Adjusted EBITDA is defined as the earnings before interest expenses, taxes and depreciation and amortization expenses associated to the LBMT acquisition on August 5, 2017, adjusted for the total adjustment to cost of sales relating to its segment and non-recurring expenses.
- LBMT's EBITDA is defined as earnings before interest expenses, taxes, depreciation and amortization expenses, business combination related costs, gain on business acquisition and fair value adjustment to purchase price allocation on inventories.
- Adjusted *pro forma* EBITDA is defined as LBMT's EBITDA, adjusted to include the EBITDA of Highland and Great Northern from April 1, 2016 until their respective acquisition by LBMT and the expected EBITDA of Sucro-Bec for the twelve-month period ended March 31, 2017, as well as certain non-recurring operating expenses.
- Adjusted *pro forma* EBITDA assuming the LBMT Integration Gains is defined as the adjusted *pro forma* EBITDA, adjusted to include any recent customer gains, procurement efficiencies, redistribution of production lines, reduction of maple syrup losses and previous integration of acquired businesses.
- Adjusted *pro forma* EBITDA assuming the LBMT Integration Gains and the RSI Integration Gains is defined as the adjusted *pro forma* EBITDA assuming the LBMT Integration Gains, adjusted to include business efficiencies, including procurement cost reductions and Operational Excellence, and customer gains, as a result of the Rogers integration.
- Decacer's *pro forma* Adjusted EBITDA is defined as earnings before interest expenses, taxes, depreciation and amortization expense for the twelve-month period ended March 31, 2017, adjusted to take into account non-recurring items identified by the Decacer Management, non-recurring items identified by the Company during the course of its due diligence and estimated adjustments required to reflect the going-forward EBITDA run-rate.
- Free cash flow is defined as cash flow from operations excluding changes in non-cash working capital, mark-to-market and derivative timing adjustments, amortization of transitional balances, financial instruments non-cash amount, and includes funds received or paid from the issue or purchase of shares, deferred financing charges paid and capital expenditures, net of operational excellence capital expenditures.

In the MD&A, we discuss the non-GAAP financial measures, including the reasons why we believe these measures provide useful information regarding the financial condition, results of operations, cash flows and financial position, as applicable. We also discuss, to the extent material, the additional purposes, if any, for which these measures are used. These non-GAAP measures should not be considered in isolation, or as a substitute for, analysis of the Company's results as reported under GAAP. Reconciliations of non-GAAP financial measures to the most directly comparable IFRS financial measures are also contained in this MD&A.

FORWARD-LOOKING STATEMENTS

This report contains Statements or information that are or may be “forward-looking statements” or “forward-looking information” within the meaning of applicable Canadian securities laws. Forward-looking statements may include, without limitation, statements and information which reflect the current expectations of Rogers, Lantic, LBMT and Decacer (together all referred to as “the Company”) with respect to future events and performance. Wherever used, the words “may,” “will,” “should,” “anticipate,” “intend,” “assume,” “expect,” “plan,” “believe,” “estimate,” and similar expressions and the negative of such expressions, identify forward-looking statements. Although this is not an exhaustive list, the Company cautions investors that statements concerning the following subjects are, or are likely to be, forward-looking statements: future prices of raw sugar, natural gas costs, the opening of special refined sugar quotas in the United States (“U.S.”), beet production forecasts, growth of the maple syrup industry, anticipated benefit of the LBMT and Decacer acquisitions (including expected adjusted EBITDA), the status of labour contracts and negotiations, the level of future dividends and the status of government regulations and investigations. Forward-looking statements are based on estimates and assumptions made by the Company in light of its experience and perception of historical trends, current conditions and expected future developments, as well as other factors that the Company believes are appropriate and reasonable in the circumstances, but there can be no assurance that such estimates and assumptions will prove to be correct. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking statements. Actual performance or results could differ materially from those reflected in the forward-looking statements, historical results or current expectations. These risks are referred to in the Company’s Annual Information Form in the “Risk Factors” section and include, without limitation: the risks related to the Company’s dependence on the operations and assets of Lantic, the risks related to government regulations and foreign trade policies, the risks related to competition faced by Lantic, the risks related to fluctuations in margins, foreign exchange and raw sugar prices, the risks related to security of raw sugar supply, the risk related to weather conditions affecting sugar beets, the risks relating to fluctuation in energy costs, the risks that LBMT and Decacer’s historical financial information may not be representative of future performance, the risk that following the acquisition of LBMT on August 5, 2017 and Decacer on November 18, 2017 (the “Acquisitions”), Rogers and Lantic may not be able to successfully integrate LBMT and Decacer’s businesses with their current business and achieve the anticipated benefits of the Acquisitions, the risks of unexpected costs or liabilities related to the Acquisitions, including that the Representation and Warranty Insurance (“RWI”) Policy may not be sufficient to cover such costs or liabilities or that the Company may not be able to recover such costs or liabilities from the shareholders of LBMT and Decacer, the risks related to the regulatory regime governing the purchase and sale of maple syrup in Québec, including the risk that LBMT and Decacer may not be able to maintain their authorized buyer status with the Federation des Producteurs Acéricoles du Québec (“FPAQ”) and the risk that it may not be able to purchase maple syrup in sufficient quantities, the risk related to the production of maple syrup being seasonal and subject to climate change, the risk related to customer concentration and LBMT and Decacer’s reliance on private label customers, the risks related to consumer habits and the risk related to LBMT and Decacer’s business growth, substantially relying on exports.

Although the Company believes that the expectations and assumptions on which forward-looking information is based are reasonable under the current circumstances, readers are cautioned not to rely unduly on this forward-looking information as no assurance can be given that it will prove to be correct. Forward-looking information contained herein is made as at the date of this MD&A and the Company does not undertake any obligation to update or revise any forward-looking information, whether as a result of events or circumstances occurring after the date hereof, unless so required by law. As of the date

of this MD&A, Management does not expect LBMT's Adjusted EBITDA to vary significantly, although it could be slightly lower than anticipated. Integration gains related to internal operational synergies have been revalidated and are expected to be well established in the second half of the fiscal year but are slightly delayed from our original targets. Anticipated commercial gains have been generally positive but some evidence of more competitive responses to new market growth has developed.

FORWARD-LOOKING INFORMATION IN THIS MD&A

The following table outlines the forward-looking information contained in this MD&A, which the Corporation considers important to better inform readers about its potential financial performance, together with the principal assumptions used to derive this information and the principal risks and uncertainties that could cause actual results to differ materially from this information.

Principal Assumptions

Principal Risks and Uncertainties

Expected adjusted EBITDA for LBMT

The expected adjusted EBITDA is the expected earnings before interest expenses, taxes, depreciation and amortization expense for a twelve-month period, adjusted for one-time costs and including the integration gains. The Corporation estimates annual operating earnings by subtracting from the estimated revenues, the estimated annual operating costs, from which it subtracts estimated general and administrative expenses. The integration gains include LBMT for fiscal 2018 and RSI integration gains for fiscal 2019. LBMT integration gains are estimated gains resulting from the three acquisitions completed by LBMT since February 2, 2016 and which include customer gains, procurement efficiencies, redistribution of production lines, reduction of maple syrup losses and previous integration of acquired businesses. RSI integration gains are estimated operational gains resulting from the combination of the Corporation and LBMT which include business efficiencies and customer gains.

- Historical financial information used to estimate amounts may not be representative of future results.
- Variability in LBMT's performance.
- Unexpected administration, selling or distribution expenditures.
- Uncertainty of successful integration and operational gains.
- Other risks relating to the business of LBMT (refer to the "Risk Factors" section of the MD&A for the year ended September 30, 2017).

Expected Adjusted *pro forma* EBITDA for Decacer

Decacer's Adjusted *pro forma* EBITDA is the expected earnings before interest expenses, taxes, depreciation and amortization expense for a twelve-month period, adjusted to take into account non-recurring items identified by Decacer Management, non-recurring items identified by the Company during the course of its due diligence and estimated adjustments required to reflect the going-forward EBITDA run-rate.

- Historical financial information used may not be representative of future results.
- Variability in Decacer's performance.
- Unexpected administration, selling or distribution expenditures.
- Uncertainty of successful integration and operational gains.

INTERNAL DISCLOSURE CONTROLS

In accordance with Regulation 52-109 respecting certification of disclosure in issuers' interim filings, the Chief Executive Officer and Chief Financial Officer have designed or caused it to be designed under their supervision, disclosure controls and procedures ("DC&P").

In addition, the Chief Executive Officer and Chief Financial Officer have designed or caused it to be designed under their supervision internal controls over financial reporting ("ICFR") to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes.

The Chief Executive Officer and Chief Financial Officer have evaluated whether or not there were any changes to the Company's ICFR during the three month period ended December 30, 2017 that have materially affected, or are reasonably likely to materially affect, the Company's ICFR. No such changes were identified through their evaluation.

LIMITATION ON SCOPE OF DESIGN

The Company has limited the scope of its DC&P and ICFR to exclude controls, policies and procedures of LBMT and its subsidiaries, including Decacer, acquired not more than 365 days before the last day of the period covered by the annual filing. The Company elected to exclude it from the scope of certification as allowed by NI 52-109. The Company intends to perform such testing within one year of acquisition.

The chart below presents the summary financial information included in the Corporation's unaudited condensed consolidated interim financial statements for the excluded business:

(In thousands of dollars, unaudited)	LMBT & Decacer \$
<u>Statement of Financial Position</u>	
Total assets	264,728
<u>Statement of Comprehensive Income</u>	
Total revenue	49,119
Results from operating activities	3,041

SELECTED FINANCIAL INFORMATION

The following is a summary of selected financial information of Rogers' unaudited condensed consolidated interim results for the first quarters of fiscal 2018 and 2017.

(In thousands of dollars, except volume and per share information)	First Quarter	
	2018	2017
Total volume		
Sugar (metric tonnes)	<u>174,144</u>	<u>168,376</u>
Maple syrup ('000 pounds)	<u>11,191</u>	<u>n/a</u>
Total revenues	\$ 204,883	\$ 159,604
Gross margin	43,113	28,176
Results from operating activities ("EBIT")	<u>31,685</u>	<u>20,596</u>
Net finance costs	4,004	2,305
Income tax expense	<u>7,465</u>	<u>4,739</u>
Net earnings	20,216	13,552
Net earnings per share:		
Basic	0.19	0.14
Diluted	0.18	0.14
Dividends per share	\$ 0.09	\$ 0.09

Consolidated results of operations

Aligned with our strategic priorities, Rogers targeted acquisition of new businesses during the fourth quarter of fiscal 2017 and the first quarter of fiscal 2018. The culmination of efforts resulted in the acquisition of LBMT on August 5, 2017 for approximately \$160.3 million, subject to closing adjustments of approximately \$6.1 million and Decacer on November 18, 2017 for approximately \$40.0 million, subject to closing adjustments of approximately \$3.0 million. This new platform will provide the Company with opportunities to grow organically, leverage sales and administrative synergies, and build our leadership position in maple syrup by leveraging our existing footprint and to a lesser extent, investigate potential opportunistic acquisitions in that segment. Results from the LBMT and Decacer operations are included in the unaudited consolidated interim results of operations since their acquisition date. As a result of the acquisition, Rogers now has the following two operating segments: Sugar and Maple products.

Total revenues

Revenues for the current quarter amounted to \$204.9 million, an increase of \$45.3 million versus the comparable quarter last year. The improvement is mainly attributable to \$49.1 million of revenues generated by LBMT and Decacer in the first quarter of fiscal 2018, slightly offset by lower sugar selling values.

Gross margin

Gross margin of \$43.1 million for the quarter does not reflect the economic margin of the Company, as it includes a gain of \$5.8 million for the mark-to-market of derivative financial instruments as explained below (See "Adjusted results" section). In fiscal 2017, a mark-to-market loss of \$0.9 million was recorded for the first quarter resulting in a gross margin of \$28.2 million for the period.

Results from operating activities ("EBIT")

EBIT is defined as earnings before interest and taxes. For the first quarter of fiscal 2018, EBIT amounted to \$31.7 million compared to \$20.6 million last year. The Maple product segment contributed \$3.0 million of the increase in EBIT. In addition, as mentioned above, the gross margin does not reflect the economic results from operating activities which had a positive impact of \$6.7 million for the quarter-over-quarter variation in mark-to-market of derivative financial instruments.

Net finance costs

Net finance costs consisted of interest paid under the revolving credit facility, as well as interest expense on the convertible unsecured subordinated debentures and other interest. It also includes a mark-to-market gain or loss on the interest swap agreements.

The net finance costs breakdown is as follows:

(In thousands of dollars)	First Quarter	
	2018	2017
Interest expense on convertible unsecured subordinated debentures	\$ 1,698	\$ 1,586
Interest on revolving credit facility	1,426	628
Amortization of deferred financing fees	249	206
Other interest expense	766	-
Net change in fair value of interest rate swap agreements	(135)	(115)
Net finance costs	\$ 4,004	\$ 2,305

The Decacer acquisition was funded by a drawdown under the revolving credit facility.

The interest expense on the convertible unsecured subordinated debentures increased by approximately \$0.1 million for the current quarter, when compared to the same period last year. The additional interest expense is mostly explained by an increase in accretion expense on the equity component of the convertible unsecured subordinated debentures.

The increase in interest on the revolving credit facility is explained by the additional drawdowns as a result of the LBMT and Decacer acquisitions as well as the additional drawdown to repay the Fourth series debentures on May 1, 2017. The increase in interest rates also had a negative impact when compared to the same period last year.

The other interest expense pertains mainly to interest payable to the FPAQ on syrup purchases, in accordance with its payment terms, which will tend to be higher between July and February of each year.

Starting on October 2, 2016, interest rate swap agreements were designated as effective cash flow hedging instruments and as a result, mark-to-market adjustments are now recorded in other comprehensive income. The transitional balances, representing the mark-to-market value recorded as of October 1, 2016, will be subsequently removed from other comprehensive income when each of the fixed interest rate tranches will be liquidated, in other words, when the fixed interest rate is paid. As a result,

the Company removed a gain of \$0.1 million from other comprehensive income and recorded a gain of the same amount in net finance costs for the current quarter and the comparative period. The transitional balance relating to interest rate swap agreements will be fully depleted in fiscal 2020. See "Adjusted results" section.

Taxation

The income tax expense is as follows:

(In thousands of dollars)	First Quarter	
	2018	2017
Current	\$ 5,761	\$ 3,845
Deferred	1,704	894
Income tax expense	\$ 7,465	\$ 4,739

The variation in current and deferred tax expense quarter-over-quarter is consistent with the increase in earnings before income taxes in fiscal 2018.

Deferred income taxes reflect temporary differences, which result primarily from the difference between depreciation claimed for tax purposes and depreciation amounts recognized for financial reporting purposes, employee future benefits and derivative financial instruments. Deferred income tax assets and liabilities are measured using the enacted or substantively enacted tax rates anticipated to apply to income in the years in which temporary differences are expected to be realized or reversed. The effect of a change in income tax rates on future income taxes is recognized in income in the period in which the change occurs.

Net earnings

Net earnings for the first quarter of fiscal 2018 were \$20.2 million compared to \$13.6 million for fiscal 2017. The improvement in net earnings is mostly explained by the after tax impact of the increase in gross margin of the Sugar segment, mostly attributed to the mark-to-market of derivative financial instruments, as well as the net earnings of the Maple product segment, excluding the interest on inter-company debt. The positive net earnings variance was somewhat offset by \$1.7 million and \$0.7 million in additional finance costs and in acquisition costs, respectively.

Adjusted results

In the normal course of business, the Company uses derivative financial instruments consisting of sugar futures, foreign exchange forward contracts, natural gas futures and interest rate swaps. For fiscal 2016 and prior years, all derivative financial instruments were marked-to-market at each reporting date, with the unrealized gains/losses charged to the consolidated statement of earnings. As of October 2, 2016, the Company adopted all the requirements of IFRS 9 (2014) Financial Instruments. As a result, the Company has designated as effective hedging instruments its natural gas futures and its interest rate swap agreements entered into in order to protect itself against natural gas prices and interest rate fluctuations as cash flow hedges. Derivative financial instruments pertaining to sugar futures and foreign exchange forward contracts continue to be marked-to-market at each reporting date and are charged to the consolidated statement of earnings. In addition, the derivative financial instruments pertaining to foreign exchange forward contracts on maple syrup sales were marked-to-market as at December 30, 2017 and also charged to the consolidated statement of earnings. The unrealized gains/losses related to natural gas futures and interest rate swaps are accounted for in other comprehensive income. The amount recognized in other comprehensive income is removed and included in net earnings under the same line item in the

consolidated statement of earnings and comprehensive income as the hedged item, in the same period that the hedged cash flows affect net earnings, reducing earnings volatility related to the movements of the valuation of these derivatives hedging instruments. The transitional marked-to-market balances outstanding as of October 1, 2016 will be amortized over time based on their settlements until all existing natural gas futures and all existing interest rate swaps agreements have expired.

The Company sells refined sugar to some clients in U.S. dollars. Prior to October 1, 2016, these sales contracts were viewed as having an embedded derivative if the functional currency of the customer was not U.S. dollars, the embedded derivative being the source currency of the transaction. The embedded derivatives were marked-to-market at each reporting date, with the unrealized gains/losses charged to the unaudited condensed consolidated interim statement of earnings with a corresponding offsetting amount charged to the unaudited condensed consolidated statement of financial position. As of October 2, 2016, the U.S. dollars of these sales contract will no longer be considered as being an embedded derivative as it was determined that the U.S. dollar is commonly used in Canada. This change in estimate will be applied prospectively, as a result, only the embedded derivatives relating to sales contracts outstanding as of October 1, 2016 will continue to be marked-to-market every quarter until all the volume on these contracts has been delivered.

Management believes that the Company's financial results are more meaningful to management, investors, analysts and any other interested parties when financial results are adjusted by the gains/losses from financial derivative instruments and from embedded derivatives. These adjusted financial results provide a more complete understanding of factors and trends affecting our business. This measurement is a non-GAAP measurement. See "Non-GAAP measures" section.

Management uses the non-GAAP adjusted results of the operating company to measure and to evaluate the performance of the business through its adjusted gross margin, adjusted EBIT and adjusted net earnings. In addition, management believes that these measures are important to our investors and parties evaluating our performance and comparing such performance to past results. Management also uses adjusted gross margin, adjusted EBIT and adjusted net earnings when discussing results with the Board of Directors, analysts, investors, banks and other interested parties. See "Non-GAAP measures" section.

The results of operations would therefore need to be adjusted by the following:

Income (loss) (In thousands of dollars)	First Quarter	
	2018	2017
Mark-to-market on:		
Sugar futures contracts	\$ 1,231	\$ (4,594)
Foreign exchange forward contracts	1,333	(1,113)
Embedded derivatives	51	722
Total mark-to-market adjustment on derivatives	\$ 2,615	\$ (4,985)
Cumulative timing differences	2,312	3,198
Adjustment to cost of sales	4,927	(1,787)
Amortization of transitional balance to cost of sales for cash flow hedges	883	848
Total adjustment to costs of sales ⁽¹⁾	\$ 5,810	\$ (939)

⁽¹⁾ See "Non-GAAP measures" section.

The fluctuations in mark-to-market adjustment on derivatives are due to the price movements in #11 world raw sugar and foreign exchange movements. See "Non-GAAP measures" section.

Cumulative timing differences, as a result of mark-to-market gains or losses, are recognized by the Company only when sugar is sold to a customer. The gains or losses on sugar and related foreign exchange paper transactions are largely offset by corresponding gains or losses from the physical transactions, namely sale and purchase contracts with customers and suppliers. See "Non-GAAP measures" section.

As previously mentioned, starting on October 2, 2016, natural gas futures were designated as an effective cash flow hedging instrument and as a result, mark-to-market adjustments are now recorded in other comprehensive income. The transitional balances, representing the mark-to-market value recorded as of October 1, 2016, will be subsequently removed from other comprehensive income when the natural gas futures will be liquidated, in other words, when the natural gas is used. As a result, in the first quarter of fiscal 2018, the Company removed a gain of \$0.9 million from other comprehensive income and recorded a gain of the same amount in cost of sales. The transitional balance relating to natural gas futures will be fully depleted in fiscal 2020. See "Non-GAAP measures" section.

The above described adjustments are added or deducted to the mark-to-market results to arrive at the total adjustment to cost of sales. For the first quarter of the current year, the total cost of sales adjustment is a gain of \$5.8 million to be deducted from the unaudited condensed consolidated interim operating results versus a loss of \$0.9 million to be added to the unaudited condensed consolidated interim results for the comparable quarter last year. See "Non-GAAP measures" section.

The following is a table showing the adjusted unaudited condensed consolidated interim results (non-GAAP) without the above mark-to-market results:

Consolidated results (In thousands of dollars, except per share information)	First Quarter	
	2018	2017
Gross margin as per financial statements	\$ 43,113	\$ 28,176
Adjustment as per above	(4,927)	1,787
Amortization of transitional balance to cost of sales as per above	(883)	(848)
Adjusted gross margin ⁽¹⁾	37,303	29,115
EBIT as per financial statements	\$ 31,685	\$ 20,596
Adjustment as per above	(4,927)	1,787
Amortization of transitional balance to cost of sales as per above	(883)	(848)
Adjusted EBIT ⁽¹⁾	25,875	21,535
Net earnings as per financial statements	20,216	13,552
Adjustment to cost of sales as per above	(4,927)	1,787

Amortization of transitional balance to net finance costs	(135)	(115)
Income taxes on above adjustments	1,577	(258)
Adjusted net earnings ⁽¹⁾	15,848	14,118
Net earnings per share basic, as per financial statements	0.19	0.14
Adjustment for the above	(0.04)	(0.01)
Adjusted net earnings per share basic ⁽¹⁾	\$ 0.15	\$ 0.15

⁽¹⁾ See "Non-GAAP measures" section.

Adjusted gross margin

Adjusted gross margin for the quarter was \$37.3 million versus \$29.1 million for the comparable period last year. During the current quarter, LBMT and Decacer contributed \$6.1 million of adjusted gross margin. The remainder of the positive adjusted gross margin variation is attributable to the Sugar segment and is explained later in the segmented information section.

Results from operating activities

Adjusted EBIT for the first quarter of fiscal 2018 was \$25.9 million compared to \$21.5 million, an increase of \$4.4 million. The increase in adjusted gross margin of \$8.2 million was partly offset by higher administration and selling expenses as well as distribution costs when compared to the comparable period, due mainly to LBMT and Decacer's administrative and selling expenses and distribution costs of \$4.0 million for the quarter. Included in the current quarter's administrative and selling expenses of the Maple product segment is \$0.7 million in acquisition costs incurred related to Decacer. Without the acquisition costs, adjusted EBIT was \$26.6 million, an increase of \$5.1 million versus the comparable period last year.

Segmented information

Following the acquisition of LBMT and Decacer, the Company has two distinct segments, namely, refined sugar and by-products, together referred to as the “Sugar” segment and maple syrup and derived products, together referred to as the “Maple products” segment.

The following is a table showing the key results by segments:

Consolidated results (In thousands of dollars, except volume)	First Quarter		
	Sugar	Maple Products	Total
Fiscal 2018			
Revenues	\$ 155,764	\$ 49,119	\$ 204,883
Gross margin	36,027	7,086	43,113
Administration and selling expenses	4,987	3,200	8,187
Distribution costs	2,396	845	3,241
Results from operating activities	28,644	3,041	31,685
<i>Non- GAAP results:</i>			
Total adjustment to the cost of sales ⁽¹⁾	(4,823)	(987)	(5,810)
Adjusted Gross Margin ⁽¹⁾	31,204	6,099	37,303
Adjusted results from operating activities ⁽¹⁾	\$ 23,821	\$ 2,054	\$ 25,875
<i>Additional information:</i>			
Addition to property, plant and equipment and intangible assets	\$ 4,242	\$ 164	\$ 4,406
Fiscal 2017			
Revenues	\$ 159,604	\$ -	\$ 159,604
Gross margin	28,176	-	28,176
Administration and selling expenses	5,290	-	5,290
Distribution costs	2,290	-	2,290
Results from operating activities	20,596	-	20,596
<i>Non- GAAP results:</i>			
Total adjustment to the cost of sales ⁽¹⁾	939	-	939
Adjusted Gross Margin ⁽¹⁾	29,115	-	29,115
Adjusted results from operating activities ⁽¹⁾	\$ 21,535	\$ -	\$ 21,535
<i>Additional information:</i>			
Addition to property, plant and equipment and intangible assets	\$ 2,373	\$ -	\$ 2,373

⁽¹⁾ See “Non-GAAP measures” section.

Results from operation by segment

Sugar

Revenues

(In thousands of dollars, except volume)	First Quarter	
	2018	2017
Volume (MT)	174,144	168,376
Revenues	\$ 155,764	\$ 159,604

The industrial market segment decreased by approximately 1,000 metric tonnes for the quarter, mostly due to timing in sugar deliveries, while the consumer volume increased for the current quarter by approximately 300 metric tonnes compared to the same period last year. Liquid volume ended the period at approximately 3,800 metric tonnes higher than the first quarter of last year. The increase is explained by additional demand from existing customers and liquid sugar deliveries of a high fructose corn syrup ("HFCS") substitutable customer in Western Canada for the full quarter of fiscal 2018 as opposed to two months in the first quarter of fiscal 2017. Exports increased by approximately 2,700 metric tonnes for the current quarter due to timing in deliveries of the Canada specific U.S. quota and Mexico sales, as well as additional U.S. high tier opportunistic sales versus the comparative period last year.

The decrease in revenues for the first quarter of fiscal 2018 versus the comparable period last year is mainly explained by a decrease in the weighted average raw sugar values in Canadian dollars, since the cost of raw sugar for all domestic sales is passed on to the Company's customers.

Gross Margin

Two major factors impact gross margins: the selling margin of the products and operating costs.

(In thousands of dollars, except per metric tonne information)	First Quarter	
	2018	2017
Gross margin	\$ 36,027	\$ 28,176
Total adjustment to cost of sales ^{(1) (2)}	(4,823)	939
Adjusted gross margin	\$ 31,204	\$ 29,115
Gross margin per metric tonne	\$ 206.88	\$ 167.34
Adjusted gross margin per metric tonne	\$ 179.19	\$ 172.92

⁽¹⁾ See "Non-GAAP measures" section.

⁽²⁾ See "Adjusted results" within the unaudited condensed consolidated interim results of operation section and "Segmented information" section.

Gross margin of \$36.0 million for the quarter does not reflect the economic margin of the sugar segment, as it includes a gain of \$4.8 million for the mark-to-market of derivative financial instruments as explained above. In fiscal 2017, a mark-to-market loss of \$0.9 million was recorded for the first quarter resulting in gross margins of \$28.2 million.

We will therefore comment on adjusted gross margin results.

Adjusted gross margin for the quarter was \$31.2 million compared to \$29.1 million for the same quarter last year, representing an increase of \$2.1 million. Included in adjusted gross margin is a non-cash pension plan income of \$1.5 million recorded as a result of the approval by the Alberta Treasury Board and Finance of an amendment to the Alberta hourly pension plan. Excluding this non-cash income,

adjusted gross margin was \$29.7 million or \$0.6 million higher than last year, mostly due to higher sales volume, somewhat offset by additional operating expenses, such as higher energy costs associated to the new carbon tax in Alberta, higher maintenance costs, due to timing and to consulting fees incurred relating to air emission reduction initiatives in Taber. Adjusted gross margin rate was \$179.19 per metric tonne or \$170.70 per metric tonne, when excluding the non-cash pension plan income of \$8.49 per metric tonne, and as a result, adjusted gross margin decreased by \$2.22 per metric tonne versus the first quarter of fiscal 2017. The decrease is due mainly to the additional operating expenses explained above.

Included in gross margin and adjusted gross margin is \$3.1 million of depreciation expense in cost of sales for the first quarter, which is comparable to the comparable period last year.

Other expenses

(In thousands of dollars)	First Quarter	
	2018	2017
Administration and selling expenses	\$ 4,987	\$ 5,290
Distribution costs	\$ 2,396	\$ 2,290

Administration and selling expenses for the first quarter of fiscal 2018 were \$0.3 million lower than the comparable period last year mostly explained by a reduction in employee benefits.

Distribution costs for the quarter were approximately \$0.1 million higher than last year.

Results from operating activities

(In thousands of dollars)	First Quarter	
	2018	2017
Results from operating activities	\$ 28,644	\$ 20,596
Adjusted results from operating activities	\$ 23,821	\$ 21,535

The results from operating activities for the first quarter of fiscal 2018 of \$28.6 million do not reflect the adjusted results from operating activities of the Company, as they include gains and losses from the mark-to-market of derivative financial instruments, as well as timing differences in the recognition of any gains and losses on the liquidation of derivative instruments. We will therefore comment on adjusted results from operating activities.

Adjusted results from operating activities for the first quarter of \$23.8 million were \$2.3 million higher than the comparable period year. The increase is mainly due to the non-cash pension plan income, higher sales volume and lower administrative and selling expenses, somewhat offset by additional operating expenses, mainly in Taber, as explained above.

Maple products*Revenues*

(In thousands of dollars and volume, in thousands of pounds)	First Quarter	
	2018	2017
Volume (pounds)	11,191	-
Revenues	\$ 49,119	\$ -

Revenues for the first quarter include revenues generated by Decacer since its acquisition on November 18, 2017.

Gross Margin

Two major factors impact gross margins: the selling margin of the products and operating costs.

(In thousands of dollars, except adjusted gross margin percentage information)	First Quarter	
	2018	2017
Gross margin	\$ 7,086	\$ -
Total adjustment to cost of sales ^{(1) (2)}	(987)	-
Adjusted gross margin	\$ 6,099	\$ -
Gross margin percentage	14.4%	-
Adjusted gross margin percentage	12.4%	-

⁽¹⁾ See "Non-GAAP measures" section.

⁽²⁾ See "Adjusted results" within the unaudited condensed consolidated interim operating results section and "Segmented information" section.

Gross margin of \$7.1 million for the quarter does not reflect the economic margin of the Maple products segment, as it includes a gain of \$1.0 million for the mark-to-market of derivative financial instruments on foreign exchange contracts.

We will therefore comment on adjusted gross margin results.

Adjusted gross margin for the quarter was \$6.1 million, representing an adjusted gross margin percentage of 12.4%. However, included in cost of sales, is an amount of \$0.3 million due to an increase in value of the finished goods inventory at the date of acquisition of Decacer. Under IFRS, all inventory of finished goods upon acquisition is valued at the estimated selling price less the sum of the costs of disposal, and a reasonable profit allowance for the selling effort of the acquirer which results in, lower selling margins when the acquired inventory is sold. As at December 30, 2017, there was no finished goods inventory remaining that existed as at the acquisition date. Without this adjustment, adjusted gross margin would have been \$6.4 million or 13.0% of revenues.

Other expenses

(In thousands of dollars)	First Quarter	
	2018	2017
Administration and selling expenses	\$ 3,201	\$ -
Distribution costs	\$ 845	\$ -

Administration and selling expenses of \$3.2 million include \$0.7 million in consulting fees and other costs incurred as a result of the acquisition of Decacer and \$0.3 million in non-recurring costs representing severance costs accrued to date.

Distribution expenses were \$0.8 million for the period.

Results from operating activities

(In thousands of dollars)	First Quarter	
	2018	2017
Results from operating activities	\$ 3,041	\$ -
Adjusted results from operating activities	\$ 2,054	\$ -

The above results from operating activities reflect the earnings before interest and taxes of LBMT for the period and Decacer since its acquisition.

Adjusted results

In the normal course of business, the Company uses derivative financial instruments consisting of foreign exchange forward contracts, which are marked-to-market at each reporting date with the unrealized gains/losses charge to the consolidated statement of earnings. In addition, the acquisition by LBMT of Decacer has resulted in expenses that do not reflect the economic performance of the operation of LBMT. Finally, certain non-cash items and non-recurring expenses also had a negative impact on the results from operating activities. As such Management believes that the Maple products segment's financial results are more meaningful to management, investors, analysts, and any other interested parties when financial results are adjusted for the above mentioned items.

The results of operations would therefore need to be adjusted by the following:

(In thousands of dollars)	First Quarter	
	2018	2017
Results from operating activities	\$ 3,041	\$ -
Total adjustment to cost of sales ^{(1) (2)}	(987)	-
Adjusted results from operating activities	2,054	-
Non-recurring expenses:		
Acquisition costs incurred	710	-
Other non-recurring items	254	-
Finished goods valued at the estimated selling price less disposal cost as of acquisition date	261	-
Depreciation and amortization	923	-
Maple products segment adjusted EBITDA ^{(1) (2)}	\$ 4,202	\$ -

⁽¹⁾ See "Non-GAAP measures" section.

⁽²⁾ See "Adjusted results" within the unaudited condensed consolidated interim operating results section and "Segmented information" section.

Other non-recurring items represent severance costs accrued to date.

Summary of Quarterly Results

The following is a summary of selected financial information of the unaudited condensed consolidated interim financial statements and non-GAAP measures of the Company for the last eight quarters:

(In thousands of dollars, except for volume and per share information)

	QUARTERS								
	2018	2017			2016				
	First	Fourth	Third	Second	First	Fourth	Third	Second

Diluted	0.14	0.08	0.10	0.10	0.14	0.14	0.08	0.08	

⁽¹⁾ Gross margin rate per MT and adjusted gross margin rate per MT pertains to the Sugar segment only.

⁽²⁾ Gross margin percentage and adjusted gross margin percentage pertains to the Maple products segment only.

Historically the first quarter (October to December) of the fiscal year is the best quarter of the sugar segment for adjusted gross margins and adjusted net earnings due to the favourable sales mix associated with an increased proportion of consumer sales during that period of the year. At the same time, the second quarter (January to March) historically has the lowest volume as well as an unfavourable customer mix, resulting in lower revenues, adjusted gross margins and adjusted net earnings.

The increase in revenues for the first quarter of fiscal 2018 and the fourth quarter of fiscal 2017 is explained by the benefit from the LBMT acquisition on August 5, 2017 and Decacer's acquisition on November 18, 2017. The timing of both acquisitions also had an impact on the maple product volume.

Liquidity

Cash flow generated by Lantic is paid to Rogers by way of dividends and return of capital on the common shares and by the payment of interest on the subordinated notes of Lantic held by Rogers, after taking a reasonable reserve for capital expenditures, debt reimbursement and working capital. The cash received by Rogers is used to pay administrative expenses, interest on the convertible debentures, income taxes and dividends to its shareholders. Lantic had no restrictions on distributions of cash arising from the compliance of financial covenants for the year.

(In thousands of dollars)	2018	2017
Net cash flow used in operating activities	\$ (10,762)	\$ (19,296)
Cash flow from financing activities	47,861	21,981
Cash flow used in investing activities	(45,116)	(1,297)
Effect of changes in exchange rate on cash	68	-
Net (decrease) increase in cash	\$ (7,949)	\$ 1,388

Cash flow from operating activities was negative \$10.8 million in fiscal 2018, as opposed to negative \$19.3 million in the comparable quarter of fiscal 2017. The negative variance decreased by \$8.5 million due to an increase in net earnings of \$6.7 million, as well as a decrease in income taxes paid of \$2.8 million and a positive non-cash working capital variation of \$0.7 million. Offsetting a portion of the positive variance is an increase in interest paid of \$1.4 million and an increase in pension plan contributions of \$0.6 million. It should be noted that the acquisition of the working capital of Decacer is shown in investing activities and therefore, only the working capital variation between the acquisition date and December 30, 2017 is presented as part of the cash flow from operating activities.

The increase in cash flow from financing activities of \$25.9 million is attributable to the increase in the revolving credit facility of \$27.5 million, slightly offset by an increase of \$1.1 million in dividends paid in the current period as compared to the comparative period due to the issuance of common shares in fiscal 2017.

The cash outflow used in investing activities increased compared to the first quarter of fiscal 2017 by \$43.8 million due mainly to the acquisition of Decacer for \$42.1 million. Also contributing to the negative variation is greater capital spending during the current period of \$1.8 million, in line with an increase in anticipated capital spending in fiscal 2018.

In order to provide additional information, the Company believes it is appropriate to measure free cash flow that is generated by the operations of the Company. Free cash flow is defined as cash flow from operations excluding changes in non-cash working capital, mark-to-market and derivative timing adjustments, amortization of transitional balances, financial instruments non-cash amount, and includes

funds received or paid from the issue or purchase of shares, deferred financing charges paid and capital expenditures, net of operational excellence capital expenditures.. Free cash flow is a non-GAAP measure.

Free cash flow is as follows:

(In thousands of dollars)	First Quarter	
	2018	2017
Cash flow used in operations	\$ (10,762)	\$ (19,296)
Adjustments:		
Changes in non-cash working capital	31,744	32,453
Mark-to-market and derivative timing adjustments	(4,927)	1,787
Amortization of transitional balances	(1,018)	(963)
Financial instruments non-cash amount	4,753	1,256
Capital expenditures	(3,055)	(1,297)
Operational excellence capital expenditures	748	304
Share options exercised	-	428
Deferred financing charges	(122)	-
Free cash flow ⁽¹⁾	\$ 17,361	\$ 14,672
Declared dividends	\$ 9,517	\$ 8,460

⁽¹⁾ See "Non-GAAP measures" section.

Free cash flow for the first quarter of 2018 was \$17.4 million compared to \$14.7 million for the same period last year, an increase of \$2.7 million. The increase is mainly explained by an increase in adjusted EBITDA, net of the non-cash pension income (See "Non-GAAP measures" section in the MD&A) of \$3.7 million as well as a decrease in income taxes paid of \$2.8 million. Offsetting a portion of the positive variance is an increase in interest paid of \$1.4 million, higher capital expenditures, net of operational excellence capital expenditures of \$1.3 million and an increase in pension plan contributions of \$0.6 million. Also, an amount of \$0.4 million was received during the first quarter of fiscal 2017 following the exercise of share options by executives, compared to none in the current period. Finally, the Company paid \$0.1 million in deferred financing charges during the current quarter to amend the revolving credit facility.

Capital expenditures, net of operational excellence expenditures, were slightly higher in fiscal 2018, in line with an increase in anticipated capital spending in fiscal 2018. Operational excellence capital expenditures are \$0.4 million higher for the quarter when compared to the same period of last fiscal year. Free cash flow is not reduced by operational excellence capital expenditures, as these projects are not necessary for the operation of the plants, but are undertaken because of the substantial operational savings that are realized once the projects are completed.

Financing charges are paid when a new debt financing is completed and such charges are deferred and amortized over the term of that debt. The cash used in the year to pay for such fees is therefore not available and as a result is deducted from free cash flow.

The Company declared a quarterly dividend of 9.0 cents per common share, for a total amount of approximately \$9.5 million for the current quarter, compared to \$8.5 million in the comparable period.

The increase is due to the issuance of common shares pursuant to the offering made under a short term prospectus in July 2017.

Changes in non-cash operating working capital represent year-over-year movements in current assets, such as accounts receivable and inventories, and current liabilities, such as accounts payables. Movements in these accounts are due mainly to timing in the collection of receivables, receipts of raw sugar and payment of liabilities. Increases or decreases in such accounts are due to timing issues and therefore do not constitute free cash flow. Such increases or decreases are financed from available cash or from the Company's available credit facility of \$315.0 million. Increases or decreases in bank indebtedness are also due to timing issues from the above and therefore do not constitute available free cash flow.

The combined impact of the mark-to-market and financial instruments non-cash amount of \$1.2 million for the current quarter do not represent cash items as these contracts will be settled when the physical transactions occur, which is the reason for the adjustment to free cash flow.

Contractual obligations:

There are no significant changes in the contractual obligations table disclosed in the Management's Discussion and Analysis of the September 30, 2017 Annual Report.

Capital resources:

On December 20, 2017, the Company amended its existing revolving credit facility thereby increasing its available credit by \$40.0 million by drawing additional funds under the accordion feature embedded in the revolving credit facility ("Additional Accordion Borrowings"). As a result of the amended revolving credit facility and the Additional Accordion Borrowings, the Company has a total of \$315.0 million of available working capital from which it can borrow at prime rate, LIBOR rate or under bankers' acceptances, plus 20 to 250 basis points, based on achieving certain financial ratios. Certain assets of the Company, including trade receivables, inventories and property, plant and equipment, have been pledged as security for the revolving credit facility, including some of the assets of LBMT. The maturity date of the amended revolving credit facility is June 28, 2022.

At December 30, 2017, \$227.5 million had been drawn from the working capital facility and \$9.1 million in cash was also available.

Cash requirements for working capital and other capital expenditures are expected to be paid from available cash resources and funds generated from operations. Management believes that the unused credit under the revolving facility is adequate to meet any future cash requirements.

OUTSTANDING SECURITIES

A total of 105,743,582 shares were outstanding as at December 30, 2017 and February 1, 2018.

On December 4, 2017, a total of 1,065,322 share options were granted at a price of \$6.23 per common share to certain executives and senior managers. Last year, on December 5, 2016, the Company granted a total of 360,000 share options to certain executives at an exercise price of \$6.51. These options are exercisable to a maximum of twenty percent per year, starting after the first anniversary date of the granting of the options and will expire after a term of ten years. Upon termination, resignation, retirement, death or long-term disability, all shares granted under the Share Option Plan not vested are forfeited.

In addition, during the quarter, a Performance Share Unit plan ("PSU") was created and on December 4, 2017, a total of 224,761 PSUs were granted to executives. These PSUs will vest at the end of the 2017-

2020 Performance Cycle based on the achievement of total shareholder returns set by the Human Resources and Compensation Committee (“HRCC”) and the Board of Directors of the Company. The value to be paid-out to each participant will be equal to the result of: the number of PSUs granted to the participant which have vested, multiplied by the volume weighted average closing price of the Common Shares on the Toronto Stock Exchange (the “TSX”) for the five trading days immediately preceding the day on which the Company shall pay the value to the participant under the PSU Plan.

CRITICAL ACCOUNTING ESTIMATES AND ACCOUNTING POLICIES

There were no significant changes in the critical estimate and accounting policies disclosed in the Management’s Discussion and Analysis of the September 30, 2017 Annual Report, except as follows:

➤ Employee benefits:

- Cash-settled performance share units:

During the quarter, the Company implemented a Performance Share Units plan (“PSUs”) entitling executives to a cash payment. A liability is recognized for the services acquired and is recorded at fair value based on the share price of the Company’s Common Shares in payables with a corresponding expense recognized in administration and selling expenses. The amount recognized as an expense is adjusted to reflect the number of units for which the related service and performance conditions are expected to be met, such that the amount ultimately recognized as an expense is based on the units of awards that meet the related service and non-market performance conditions at the vesting date. At the end of each reporting period until the liability is settled, the fair value of the liability is re-measured, with any changes in fair value recognized in the consolidated statement of earnings of the period.

SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies as disclosed in the Company’s audited annual consolidated financial statements for the year ended September 30, 2017 have been applied consistently in the preparation of these unaudited condensed consolidated interim financial statements except as noted below:

➤ IAS 7, *Disclosure Initiative*:

On January 7, 2016 the IASB issued Disclosure Initiative (amendments to IAS 7). The amendments apply prospectively for annual periods beginning on or after January 1, 2017. Earlier application is permitted.

The amendments require disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, includes both changes arising from cash flow and non-cash changes. One way to meet this new disclosure requirement is to provide a reconciliation between the opening and closing balances for liabilities from financing activities.

The Company adopted the amendments to IAS 7 in its consolidated financial statements for the annual period beginning on October 1, 2017. The adoption of the standard did not have an impact on the consolidated interim financial statements.

➤ IAS 12, *Recognition of Deferred Tax Assets for Unrealized Losses*:

On January 19, 2016 the IASB issued Recognition of Deferred Tax Assets for Unrealized Losses (Amendments to IAS 12). The amendments apply retrospectively for annual periods beginning on or after January 1, 2017. Earlier application is permitted.

The amendments clarify that the existence of a deductible temporary difference depends solely on a comparison of the carrying amount of an asset and its tax base at the end of the reporting period, and is not affected by possible future changes in the carrying amount or expected manner of recovery of the asset. The amendments also clarify the methodology to determine the future taxable profits used for assessing the utilization of deductible temporary differences.

The Company adopted the amendments to IAS 12 in its consolidated interim financial statements for the annual period beginning on October 1, 2017. The adoption of the amendments did not have an impact on the consolidated interim financial statements.

➤ Annual Improvements to IFRS Standards (2014-2016) Cycle:

On December 8, 2016 the IASB issued narrow-scope amendments to three standards as part of its annual improvements process. Each of the amendments has its own specific transition requirements and effective date.

Amendments were made to the following standard:

- Clarification that IFRS 12, *Disclosures of Interests in Other Entities* also applies to interests that are classified as held for sale, held for distribution, or discontinued operations, effective retrospectively for annual periods beginning on or after January 1, 2017.

The Company adopted the amendment in its consolidated interim financial statements for the annual period beginning October 1, 2017. The adoption of the amendments did not have an impact on the consolidated interim financial statements.

CHANGES IN ACCOUNTING PRINCIPLES AND PRACTICES NOT YET ADOPTED

A number of new standards, and amendments to standards and interpretations, are not yet effective and have not been applied in preparing these unaudited condensed interim consolidated financial statements. New standards and amendments to standards and interpretations that are currently under review include:

➤ IFRS 15, *Revenue from Contracts with Customers*:

On May 28, 2014 the IASB issued IFRS 15 *Revenue from Contracts with Customers*. IFRS 15 will replace IAS 11 *Construction Contracts*, IAS 18 *Revenue*, IFRIC 13 *Customer Loyalty Programmes*, IFRIC 15 *Agreements for the Construction of Real Estate*, IFRIC 18 *Transfer of Assets from Customers*, and SIC 31 *Revenue – Barter Transactions Involving Advertising Services*. The new standard is effective for years beginning on or after January 1, 2018. Earlier application is permitted.

The standard contains a single model that applies to contracts with customers and two approaches to recognizing revenue: at a point in time or over time. The model features a contract-based five-step analysis of transactions to determine whether, how much and when revenue is recognized. New estimates and judgmental thresholds have been introduced, which may affect the amount and/or timing of revenue recognized.

The new standard applies to contracts with customers. It does not apply to insurance contracts, financial instruments or lease contracts, which fall in the scope of other IFRSs.

The Company intends to adopt IFRS 15 in its consolidated financial statements for the year beginning on September 30, 2018. The extent of the impact of adoption of the standard on the consolidated financial statements of the Company has not yet been determined.

➤ IFRS 16, *Leases*:

On January 13, 2016 the IASB issued IFRS 16 *Leases*. The new standard is effective for annual periods beginning on or after January 1, 2019. Earlier application is permitted for entities that apply IFRS 15 *Revenue from Contracts with Customers* at or before the date of initial adoption of IFRS 16. IFRS 16 will replace IAS 17 *Leases*.

This standard introduces a single lessee accounting model and requires a lessee to recognize assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. A lessee is required to recognize a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments.

This standard substantially carries forward the lessor accounting requirements of IAS 17, while requiring enhanced disclosures to be provided by the lessors. Other areas of the lease accounting model have been impacted, including the definition of a lease. Transitional provisions have been provided.

The Company intends to adopt IFRS 16 in its consolidated financial statements for the annual period beginning on September 29, 2019. The extent of the impact of adoption of the standard on the consolidated financial statements of the Company has not yet been determined.

Additional new standards, and amendments to standards and interpretations, include: IFRS 2, *Classification and Measurement of Share-based Payment Transactions*, Annual Improvements to IFRS Standards (2014-2016) Cycle and (2015-2017) Cycle, IFRIC 22, *Foreign Currency Transactions and Advance Consideration* and IFRIC 23 *Uncertainty over Income Tax Treatments*. The Company intends to adopt these new standards, and amendments to standards and interpretations, in its consolidated financial statements in each of their respective annual period for which they become applicable. The extent of the impact of adoption of these new standards, and amendments to standards and interpretations, has not yet been determined. Refer to note 3 (d) to the unaudited condensed consolidated interim financial statements for more detail.

RISK FACTORS

Risk factors in the Company's business and operations are discussed in the Management's Discussion and Analysis of our Annual Report for the year ended September 30, 2017. This document is available on SEDAR at www.sedar.com or on one of our websites at www.lantic.ca or www.rogerssugarinc.com.

OUTLOOK

In fiscal 2018, we expect the industrial market segment to decrease slightly, while the consumer volume should be comparable to fiscal 2017.

The liquid market segment should continue to be strong, benefitting from some growth with existing customers, the recapture of some of the volume loss in fiscal 2017 and the benefit of a full year of supply to a large bottler account in Western Canada. As a result, we expect the liquid market segment to surpass fiscal 2017 by approximately 10,000 metric tonnes.

As for the export segment, total volume is anticipated to increase by approximately 5,000 metric tonnes due to additional sales to Mexico and U.S. high tier opportunistic sales.

Overall, we expect total volume to increase by approximately 10,000 metric tonnes.

In fiscal 2018, the Company will benefit from a full year of operations of LBMT. As previously presented in the short form prospectus dated July 21, 2017, we expect LBMT's Adjusted EBITDA (See "Non-GAAP measures" section of the MD&A) to approximate \$18.4 million, which includes an increase

in sales volume and related selling margins in addition to some operational efficiency gains for a total of approximately \$2.9 million. Management does not expect LBMT's Adjusted EBITDA to vary significantly, although it could be slightly lower than anticipated. Integration gains related to internal operational synergies have been revalidated and are expected to be well established in the second half of the fiscal year but are slightly delayed from our original targets. Anticipated commercial gains have been generally positive but some evidence of more competitive responses to new market growth has developed. In addition, Management expects non-recurring expenses of approximately \$1.0 million related to severance costs. In fiscal 2019, we expect additional integration gains of approximately \$2.1 million to be fully realized by the end of fiscal 2019. Therefore, fiscal 2019 Adjusted EBITDA for LBMT should amount to approximately \$20.5 million assuming the realization of all expected integration gains.

On November 20, 2017, the Company announced the acquisition of Decacer for \$40.0 million, subject to post-closing adjustments. Decacer's Adjusted *pro forma* EBITDA (See "Non-GAAP measures" section) on an annual basis is estimated at \$5.1 million. This acquisition, combined with the earlier acquisition of LBMT, allows us to create a solid platform and to broaden the Company's maple syrup operations and expand its product offering, including a unique maple sugar dehydration technology as well as enhancing the potential for additional operational synergies.

We expect energy costs to increase by approximately \$1.5 million in fiscal 2018 as a result of the implementation of the carbon tax in Alberta on January 1, 2017. The current carbon tax amounts to \$1.011 per gigajoule and will increase to \$1.517 per gigajoule on January 1, 2018.

Approximately 75% of fiscal 2018's natural gas requirements have been hedged at average prices comparable to those realized in fiscal 2017. In addition, some futures positions for fiscal 2019 to 2022 have also been taken. Some of these positions are at prices higher than current market value, but are at the same or better levels than those achieved in fiscal 2017. We will continue to monitor natural gas market dynamics with the objective of maintaining competitive costs and minimizing natural gas cost variances.

Capital expenditures for fiscal 2018 are expected to increase compared to fiscal 2017 as the Company intends to spend approximately \$6.0 million on operational excellence capital projects. The Company is currently evaluating various scenarios in order to be fully compliant on air emission standards for the 2019 beet harvesting season and a decision is expected next quarter. To achieve this objective, the Company expects to undertake significant capital expenditure for this project, starting in the second half of the fiscal year. Early estimates of the net investment required to remediate the non-compliance range between \$15 million and \$25 million.

The beet slicing campaign is expected to be completed in late February. We expect that the current crop should derive approximately 125,000 metric tonnes of refined sugar.

Total pension plan expense is expected to decrease by approximately \$2.4 million in fiscal 2018 as a result of the increase in discount rates, as well as to the approval by the Alberta Treasury Board and Finance of an amendment to the Alberta Hourly Plan.

As a result of the acquisition of LBMT and Decacer, as well as the recent increase in interest rate and expectations of further increases by the Bank of Canada in fiscal 2018, we anticipate higher interest expense when compared to fiscal 2017.

Labour negotiations with the Vancouver refinery unionized employees for the renewal of the labour contract will start over the coming weeks. The collective agreement expires at the end of February.

Cash, beginning of period	17,033	1,246
Cash, end of period	\$ 9,084	\$ 2,634

Supplemental cash flow information (note 18)

The accompanying notes are an integral part of these unaudited condensed consolidated interim financial statements.

1. Reporting entity:

Rogers Sugar Inc. (“Rogers” or the “Company”) is a company domiciled in Canada, incorporated under the *Canada Business Corporations Act*. The head office of Rogers is located at 123 Rogers Street, Vancouver, British Columbia, V6B 3V2. The unaudited condensed consolidated interim financial statements of Rogers for the three months ended December 30, 2017 and December 31, 2016 comprise Rogers and its subsidiary, Lantic Inc., (together referred to as the “Company”). The principal business activities of the Company are the refining, packaging and marketing of sugar and maple products.

2. Basis of presentation and statement of compliance:

(a) Statement of compliance:

These unaudited condensed consolidated interim financial statements have been prepared in accordance with IAS 34 *Interim Financial Reporting* on a basis consistent with those accounting policies followed by the Company in the most recent audited consolidated annual financial statements other than the adoption of the amendments of IAS 7, IAS 12 and IFRS 12 as described in note 3(c). Certain information, in particular the accompanying notes, normally included in the audited annual consolidated financial statements prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”) has been omitted or condensed. Accordingly, these unaudited condensed consolidated interim financial statements do not include all the information required for full annual financial statements, and, therefore, should be read in conjunction with the audited annual consolidated financial statements and the notes thereto for the year ended September 30, 2017. The quarterly unaudited condensed consolidated interim financial statements were not reviewed nor audited by our external auditors and were authorized for issue by the Board of Directors on February 1, 2018.

(b) Basis of measurement:

These unaudited condensed consolidated interim financial statements have been prepared on the historical cost basis except for the following material items in the unaudited condensed consolidated statements of financial position:

- (i) derivative financial instruments are measured at fair value;
- (ii) the defined benefit liability is recognized as the net total of the present value of the defined benefit obligation less the total of the fair value of the plan assets and the unrecognized past service costs; and
- (iii) assets and liabilities acquired in business combinations are measured at fair value at acquisition date.

(c) Functional and presentation currency:

These unaudited condensed consolidated interim financial statements are presented in Canadian dollars since it is the Company’s functional currency. All financial information presented in Canadian dollars has been rounded to the nearest thousands, except as noted and per share amounts.

ROGERS SUGAR INC.

2

Notes to unaudited condensed consolidated interim financial statements
(In thousands of dollars except as noted and amounts per share)

2. Basis of presentation and statement of compliance (continued):

(d) Use of estimates and judgements:

The preparation of these unaudited condensed consolidated interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

In preparing these unaudited condensed consolidated interim financial statements, the significant judgements made by management in applying the Company's accounting policies and key sources of estimation of uncertainty are as those applied and described in the Company's audited annual consolidated financial statements for the year ended September 30, 2017.

3. Significant accounting policies:

The significant accounting policies as disclosed in the Company's audited annual consolidated financial statements for the year ended September 30, 2017 have been applied consistently in the preparation of these unaudited condensed consolidated interim financial statements, except as noted below:

(a) Basis of consolidation:

(i) Subsidiaries:

The consolidated financial statements include the Company and the subsidiaries it controls, Lantic Inc. ("Lantic") and L.B. Maple Treat Corporation ("LBMT"). LBMT is a combination of five businesses: LBMT, Highland Sugarworks Inc. ("Highland"), Great Northern Maple Products Inc. ("Great Northern" amalgamated with LBMT on December 1, 2016), 9020-2292 Québec Inc. ("Decacer"), and the assets of Sucro-Bec L. Fortier Inc. ("Sucro-Bec"). Control exists where the Company is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date control commences until the date that control ceases. The accounting policies of subsidiaries are aligned with the policies adopted by the Company.

Inter-company balances and transactions, and any unrealized income and expenses arising from inter-company transactions, are eliminated in preparing the consolidated financial statements.

3. Significant accounting policies (continued):

(b) Employee benefits:

(i) Cash-settled Performance Share Units:

During the quarter, the Company implemented a Performance Share Units plan ("PSU") entitling executives to a cash payment. A liability is recognized for the services acquired and is recorded at fair value based on the share price of the Company's Common Shares in payables with a corresponding expense recognized in administration and selling expenses. The amount recognized as an expense is adjusted to reflect the number of units for which the related service and performance conditions are expected to be met, such that the amount ultimately recognized as an expense is based on the units of awards that do meet the related service and non-market performance conditions at the vesting date. At the end of each reporting period until the liability is settled, the fair value of the liability is remeasured, with any changes in fair value recognized in the consolidated statement of earnings of the period.

(c) New standards and interpretations adopted:

(i) IAS 7, *Disclosure Initiative*

On January 7, 2016 the IASB issued *Disclosure Initiative* (amendments to IAS 7). The amendments apply prospectively for annual periods beginning on or after January 1, 2017. Earlier application is permitted.

The amendments require disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, includes both changes arising from cash flow and non-cash changes. One way to meet this new disclosure requirement is to provide a reconciliation between the opening and closing balances for liabilities from financing activities.

The Company adopted the amendments to IAS 7 in its consolidated financial statements for the annual period beginning on October 1, 2017. The adoption of the standard did not have an impact on the consolidated interim financial statements.

(ii) IAS 12, *Recognition of Deferred Tax Assets for Unrealized Losses*:

On January 19, 2016 the IASB issued *Recognition of Deferred Tax Assets for Unrealized Losses* (Amendments to IAS 12). The amendments apply retrospectively for annual periods beginning on or after January 1, 2017. Earlier application is permitted.

The amendments clarify that the existence of a deductible temporary difference depends solely on a comparison of the carrying amount of an asset and its tax base at the end of the reporting period, and is not affected by possible future changes in the carrying amount or expected manner of recovery of the asset. The amendments also clarify the methodology to determine the future taxable profits used for assessing the utilization of deductible temporary differences.

3. Significant accounting policies (continued):

(c) New standards and interpretations adopted (continued):

(ii) IAS 12, *Recognition of Deferred Tax Assets for Unrealized Losses* (continued):

The Company adopted the amendments to IAS 12 in its consolidated interim financial statements for the annual period beginning on October 1, 2017. The adoption of the amendments did not have an impact on the consolidated interim financial statements.

(iii) Annual Improvements to IFRS Standards (2014-2016) Cycle:

On December 8, 2016 the IASB issued narrow-scope amendments to three standards as part of its annual improvements process. Each of the amendments has its own specific transition requirements and effective date.

Amendments were made to the following standard:

- Clarification that IFRS 12, *Disclosures of Interests in Other Entities* also applies to interests that are classified as held for sale, held for distribution, or discontinued operations, effective retrospectively for annual periods beginning on or after January 1, 2017.

The Company adopted the amendment in its consolidated interim financial statements for the annual period beginning October 1, 2017. The adoption of the amendments did not have an impact on the consolidated interim financial statements.

(d) New standards and interpretations not yet adopted:

A number of new standards and amendments to standards and interpretations are not yet effective for the three months ended December 30, 2017 and have not been applied in preparing these unaudited condensed consolidated interim financial statements. New standards and amendments to standards and interpretations that are currently under review include:

(i) IFRS 2, *Classification and Measurement of Share-based Payment Transactions*:

On June 20, 2016, the IASB issued amendments to IFRS 2, *Share-based Payment*, clarifying how to account for certain types of share-based payment transactions. The amendments apply for annual periods beginning on or after January 1, 2018. As a practical simplification, the amendments can be applied prospectively. Retrospective, or early application is permitted if information is available without the use of hindsight.

The amendments provide requirements on the accounting for:

- The effects of vesting and non-vesting conditions on the measurement of cash-settled share-based payments;
- Share-based payment transactions with a net settlement feature for withholding tax obligations; and
- A modification to the terms and conditions of a share-based payment that changes the classification of the transaction from cash-settled to equity-settled.

3. Significant accounting policies (continued):

(d) New standards and interpretations not yet adopted (continued):

(i) IFRS 2, *Classification and Measurement of Share-based Payment Transactions* (continued):

The Company intends to adopt the amendments to IFRS 2 in its consolidated financial statements for the annual period beginning on September 30, 2018. The extent of the impact of adoption of the standard on the consolidated financial statements of the Company has not yet been determined.

(ii) IFRS 15, *Revenue from Contracts with Customers*:

On May 28, 2014 the IASB issued IFRS 15, *Revenue from Contracts with Customers*. IFRS 15 will replace IAS 11, *Construction Contracts*, IAS 18, *Revenue*, IFRIC 13, *Customer Loyalty Programmes*, IFRIC 15, *Agreements for the Construction of Real Estate*, IFRIC 18, *Transfer of Assets from Customers*, and SIC 31, *Revenue – Barter Transactions Involving Advertising Services*. The new standard is effective for years beginning on or after January 1, 2018. Earlier application is permitted.

The standard contains a single model that applies to contracts with customers and two approaches to recognizing revenue: at a point in time or over time. The model features a contract-based five-step analysis of transactions to determine whether, how much and when revenue is recognized. New estimates and judgmental thresholds have been introduced, which may affect the amount and/or timing of revenue recognized.

The new standard applies to contracts with customers. It does not apply to insurance contracts, financial instruments or lease contracts, which fall in the scope of other IFRSs.

The Company intends to adopt IFRS 15 in its consolidated financial statements for the year beginning on September 30, 2018. The extent of the impact of adoption of the standard on the consolidated financial statements of the Company has not yet been determined.

(iii) IFRS 16, *Leases*:

On January 13, 2016 the IASB issued IFRS 16, *Leases*. The new standard is effective for annual periods beginning on or after January 1, 2019. Earlier application is permitted for entities that apply IFRS 15, *Revenue from Contracts with Customers* at or before the date of initial adoption of IFRS 16. IFRS 16 will replace IAS 17, *Leases*.

This standard introduces a single lessee accounting model and requires a lessee to recognize assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. A lessee is required to recognize a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments.

3. Significant accounting policies (continued):

(d) New standards and interpretations not yet adopted (continued):

(iii) IFRS 16, *Leases* (continued):

This standard substantially carries forward the lessor accounting requirements of IAS 17, while requiring enhanced disclosures to be provided by the lessors. Other areas of the lease accounting model have been impacted, including the definition of a lease. Transitional provisions have been provided.

The Company intends to adopt IFRS 16 in its consolidated financial statements for the annual period beginning on September 29, 2019. The extent of the impact of adoption of the standard on the consolidated financial statements of the Company has not yet been determined.

(iv) IFRIC 22, *Foreign Currency Transactions and Advance Consideration*:

On December 8, 2016, the IASB issued IFRIC Interpretation 22, *Foreign Currency Transactions and Advance Consideration*.

The Interpretation clarifies that the date of the transaction for the purpose of determining the exchange rate to use on initial recognition of the related asset, expense or income (or part of it) is the date on which an entity initially recognizes the non-monetary asset or non-monetary liability arising from the payment or receipt of advance consideration.

The Interpretation is applicable for annual periods beginning on or after January 1, 2018. Earlier application is permitted.

The Company intends to adopt the Interpretation in its consolidated financial statements for the annual period beginning on September 30, 2018, as applicable. The extent of the impact of adoption of the Interpretation has not yet been determined.

(v) IFRIC 23, *Uncertainty over Income Tax Treatments*:

On June 7, 2017, the IASB issued IFRIC Interpretation 23, *Uncertainty over Income Tax Treatments*.

The Interpretation provides guidance on the accounting for current and deferred tax liabilities and assets in circumstances in which there is uncertainty over income tax treatments.

The Interpretation is applicable for annual periods beginning on or after January 1, 2019. Earlier application is permitted.

The Interpretation requires an entity to:

- Contemplate whether uncertain tax treatments should be considered separately, or together as a group, based on which approach provides better predictions of the resolution;
- Reflect an uncertainty in the amount of income tax payable (recoverable) if it is probable that it will pay (or recover) an amount for the uncertainty; and

3. Significant accounting policies (continued):

(d) New standards and interpretations not yet adopted (continued):

(v) IFRIC 23, *Uncertainty over Income Tax Treatments* (continued):

- Measure a tax uncertainty based on the most likely amount or expected value depending on whichever method better predicts the amount payable (recoverable).

The Company intends to adopt the Interpretation in its consolidated financial statements for the annual period beginning on September 29, 2019. The extent of the impact of the adoption of the Interpretation has not yet been determined.

(vi) Annual Improvements to IFRS Standards (2015-2017) Cycle:

On December 12, 2017 the IASB issued narrow-scope amendments to three standards as part of its annual improvements process.

The amendments are effective on or after January 1, 2019, with early application permitted. Each of the amendments has its own specific transition requirements.

Amendments were made to the following standards:

- IFRS 3, *Business Combinations* and IFRS 11, *Joint Arrangements* – to clarify how a company accounts for increasing its interest in a joint operation that meets the definition of a business;
- IAS 12, *Income Taxes* – to clarify that all income tax consequences of dividends are recognized consistently with the transactions that generated the distributable profits – i.e. in profit or loss, OCI, or equity; and
- IAS 23, *Borrowing Costs* – to clarify that specific borrowings – i.e. funds borrowed specifically to finance the construction of a qualifying asset – should be transferred to the general borrowings pool once the construction of the qualifying asset has been completed.

The Company intends to adopt these amendments in its financial statements for the annual period beginning on September 29, 2019. The extent of the impact of adoption of the amendments has not yet been determined.

4. Business combinations:

On November 18, 2017, the Company acquired all of the issued and outstanding shares of Decacer for a total consideration of \$43.0 million (\$42.1 million net of cash acquired) (the “Decacer Transaction”). The Company financed the acquisition, including transaction costs, with a draw-down on the Company’s \$315.0 million amended credit facility.

Decacer is a major bottler and distributor of branded and private label maple syrup and maple sugar based in Dégelis, Québec.

ROGERS SUGAR INC.

8

Notes to unaudited condensed consolidated interim financial statements
(In thousands of dollars except as noted and amounts per share)

4. Business combinations (continued):

The Company has determined the fair value of the assets acquired and liabilities assumed based on management's preliminary best estimate of their fair values and taking into account all relevant information available at that time. As of the reporting date, the Company had not yet completed the purchase price allocation over the identifiable net assets and goodwill. Information to confirm the fair value of certain assets and liabilities is still to be obtained. As the Company obtains more information, the allocation will be completed.

The following table presents the purchase price allocations based on the best information available to the Company to date:

Identifiable assets and liabilities assumed:	\$
Cash	928
Trade and other receivables	3,832
Inventories	15,711
Prepaid expenses	96
Property, plant and equipment	8,131
Intangible assets	8,507
Trade and other payables	(8,310)
Income taxes payable	(197)
Deferred tax liabilities	(3,490)
Total net assets acquired	25,208
Total consideration transferred	42,989
Goodwill (note 11)	17,781
	\$
Revolving credit facility	42,989
Total consideration transferred	42,989

The trade receivables comprise a gross amount of \$3.8 million, of which nil million was expected to be uncollectable at the acquisition date.

Goodwill is attributable primarily to expected synergies and assembled workforce, which were not recorded separately since they did not meet the recognition criteria for identifiable intangible assets. Goodwill and intangible assets recorded in connection with this acquisition are not deductible for tax purposes.

The operating results of Decacer are included in the maple products segment. The consolidated results of the Company include net sales of \$4.9 million and results from operating activities of \$0.5 million related to Decacer since the date of acquisition. If the acquisition had occurred on October 1, 2017, the consolidated results of the Company would have included net sales of approximately \$10.6 million and results from operating activities of approximately \$1.1 million, based on management's best estimates. In determining these estimated amounts, management assumed that the fair value adjustments that arose on the date of acquisition would have been the same if the acquisition had occurred on October 1, 2017.

ROGERS SUGAR INC.

9

Notes to unaudited condensed consolidated interim financial statements
(In thousands of dollars except as noted and amounts per share)

4. Business combinations (continued):

Acquisition-related costs of \$0.7 million for legal fees, due diligence costs and other fees have been expensed in relation to the above business combination. These costs have been recorded in administration and selling expenses in the consolidated statements of earnings and comprehensive income.

During the first quarter of fiscal 2018, as additional relevant information was obtained for the August 5, 2017 acquisition of all of the issued and outstanding shares of LBMT, the Company adjusted the purchase price allocation resulting in an increase in trade and other receivables of \$3.1 million with the offset to goodwill. As at the reporting date, the Company had not yet completed the purchase price allocation over the identifiable net assets and goodwill. As the Company obtains more information, the allocation will be completed.

5. Depreciation and amortization expense:

Depreciation and amortization expense were charged to the unaudited condensed consolidated interim statements of earnings as follows:

	For the three months ended	
	December 30, 2017	December 31, 2016
	\$	\$
Depreciation of property, plant and equipment:		
Cost of sales	3,348	3,108
Administration and selling expenses	108	104
	3,456	3,212
Amortization of intangible assets:		
Administration and selling expenses	687	53
Total depreciation and amortization expense	4,143	3,265

ROGERS SUGAR INC.

10

Notes to unaudited condensed consolidated interim financial statements
(In thousands of dollars except as noted and amounts per share)

6. Finance income and finance costs:

Recognized in net earnings:

	For the three months ended	
	December 30, 2017	December 31, 2016
	\$	\$
Net change in fair value of interest rate swap (note 9)	135	115
Finance income	135	115
Interest expense on convertible unsecured subordinated debentures, including accretion of \$119 (2017 - \$25) (note 14)	1,698	1,586
Interest on revolving credit facility	1,426	628
Amortization of deferred financing fees	249	206
Other interest expense	766	-
Finance costs	4,139	2,420
Net finance costs recognized in net earnings	4,004	2,305

7. Restricted cash:

Restricted cash represents balances assumed by the Company as a result of having acquired all of the issued and outstanding shares of LBMT. They are as a result of:

- (a) On December 1, 2016, LBMT acquired all issued and outstanding Class A shares of Great Northern with \$7.0 million cash consideration (which was placed in escrow), conditionally payable in quarterly installments contingent on achieving monthly and annual sales volume targets to a specific client for the twelve-month periods ending November 30, 2017 and November 30, 2018. The fair value of the contingent consideration was determined to be \$6.6 million and was calculated using a probability-weighted expectation of the payment of the contingent consideration and a discount rate of 3.45%. As at December 30, 2017, cash held in an escrow account was \$2.5 million and the carrying value of the contingent consideration payable was \$3.0 million (See Note 13, Other long-term liabilities).
- (b) On August 26, 2016, LBMT acquired all issued and outstanding common stock of Highland with \$1.7 million (US \$1.3 million) as a balance of purchase price payable. Fifty percent of the balance of purchase price payable was paid on August 26, 2017 and the remainder is to be paid on February 26, 2018. The fair value of the balance of purchase price payable, as at the acquisition date, was \$1.7 million (US \$1.3 million) and was calculated using a discount rate of 3.14%. Under the share purchase agreement, the amount of the balance of purchase price was placed in escrow pursuant to an escrow agreement and, as at December 30, 2017, cash held in an escrow account was \$0.8 million, and the carrying value of the balance of the purchase price payable was \$0.8 million (See Note 13, Other long-term liabilities).

ROGERS SUGAR INC.

11

Notes to unaudited condensed consolidated interim financial statements
(In thousands of dollars except as noted and amounts per share)

8. Inventories:

During the three months ended December 30, 2017, the Company recorded an amount of nil (September 30, 2017 - nil, December 31, 2016 - \$0.1 million) related to onerous contracts as defined in IAS 37 paragraph 66, as a write-down to inventory through cost of sales.

9. Financial instruments:

Disclosures relating to risks exposures, in particular credit risk, liquidity risk, foreign currency risk, interest rate risk and equity risk were provided in the September 30, 2017 annual consolidated financial statements and there have been no significant changes in the Company's risk exposures during the three months ended December 30, 2017.

For its financial assets and liabilities measured at amortized cost as at December 30, 2017, the Company has determined that the carrying value of its short-term financial assets and liabilities approximates their fair value because of the relatively short periods to maturity of these instruments.

Details of recorded gains (losses) for the year, in marking-to-market all derivative financial instruments and embedded derivatives that are outstanding at quarter end, are noted below. For sugar futures contracts (derivative financial instruments), the amounts noted below are netted with the variation margins paid or received to/from brokers at the end of the reporting period. Natural gas forwards and sugar futures have been marked-to-market using published quoted values for these commodities, while foreign exchange forward contracts have been marked-to-market using rates published by the financial institution which is counterparty to these contracts.

The fair value of natural gas contracts, foreign exchange forward contracts and interest rate swap calculations include a credit risk adjustment for the Company's or counterparty's credit, as appropriate.

ROGERS SUGAR INC.

12

Notes to unaudited condensed consolidated interim financial statements
(In thousands of dollars except as noted and amounts per share)

9. Financial instruments (continued):

As at December 30, 2017, September 30, 2017 and December 31, 2016, the Company's financial derivatives carrying values were as follows:

	Financial Assets		Financial Liabilities	
	Current	Non-Current	Current	Non-Current
	December 30, 2017		December 30, 2017	
	\$	\$	\$	\$
Derivative financial instruments measured at fair value through profit or loss:				
Sugar futures contracts	221	44	-	-
Foreign exchange forward contracts	1,191	984	-	-
Embedded derivatives	-	-	23	-
Derivative financial instruments designated as effective cash flow hedging instruments:				
Natural gas futures contracts	-	-	3,735	2,231
Interest rate swap	35	1,404	-	-
	1,447	2,432	3,758	2,231

	Financial Assets		Financial Liabilities		Financial Assets		Financial Liabilities	
	Current	Non-Current	Current	Non-Current	Current	Non-Current	Current	Non-Current
	September 30, 2017				December 31, 2016			
	\$	\$	\$	\$	\$	\$	\$	\$
Derivative financial instruments measured at fair value through profit or loss:								
Sugar futures contracts	93	-	-	37	-	60	102	-
Foreign exchange forward contracts	-	1,280	2,712	-	525	819	-	-
Embedded derivatives	-	-	74	-	394	-	-	-
Derivative financial instruments designated as effective cash flow hedging instruments:								
Natural gas futures contracts	-	-	3,826	2,344	-	-	2,070	3,605
Interest rate swap	-	1,043	53	-	-	-	355	581
	93	2,323	6,665	2,381	919	879	2,527	4,186

ROGERS SUGAR INC.

13

Notes to unaudited condensed consolidated interim financial statements
(In thousands of dollars except as noted and amounts per share)

9. Financial instruments (continued):

	Charged to cost of sales		Charged to finance income		For the three months ended	
	Unrealized gain / (loss)		(costs)		Other comprehensive	
	December 30, 2017	December 31, 2016	December 30, 2017	December 31, 2016	December 30, 2017	December 31, 2016
	\$	\$	\$	\$	\$	\$
Derivative financial instruments measured at fair value through profit or loss:						
Sugar futures contracts	1,231	(4,594)	-	-	-	-
Foreign exchange forward contracts	1,333	(1,113)	-	-	-	-
Embedded derivatives	51	722	-	-	-	-
Derivative financial instruments designated as effective cash flow hedging instruments:						
Natural gas futures contracts	883	848	-	-	(680)	963
Interest rate swap	-	-	135	115	313	431
	3,498	(4,137)	135	115	(367)	1,394

The following table summarizes the Company's hedging components of other comprehensive income as at December 30, 2017 and December 31, 2016:

	For the three months ended	
	December 30, 2017	December 31, 2016
	\$	\$
Net (loss) gain on derivative designated as cash flow hedges:		
Natural gas futures contracts	(680)	963
Interest rate swap	313	431
Income taxes	97	(367)
Hedging (loss) gain	(270)	1,027

For the three months ended December 30, 2017, the derivatives designated as cash flow hedges were considered to be fully effective and no ineffectiveness has been recognized in net earnings.

Approximately \$0.8 million of net losses presented in accumulated other comprehensive income are expected to be reclassified to net earnings within the next twelve months.

ROGERS SUGAR INC.

14

Notes to unaudited condensed consolidated interim financial statements
(In thousands of dollars except as noted and amounts per share)

10. Other Assets:

	December 30, 2017	September 30, 2017	December 31, 2016
	\$		\$
Deferred financing charges, net	1,041	979	461
Other	(7)	3	11
	1,037	982	472

Deferred financing charges represent the fees and costs related to the negotiation of the 5-year credit agreement. Borrowings under the revolving credit facility are short term in nature and can be repaid at any time. Therefore, deferred financing charges are presented separately and not applied against the debt (see Note 12, Revolving credit facility).

During the quarter, the Company paid \$0.1 million in financing fees to amend its existing revolving credit facility by drawing additional funds under the accordion feature (see Note 12, Revolving credit facility).

The fees, along with the outstanding balance of the previously deferred financing charges, are amortized over the extended life of the revolving credit facility, which matures on June 28, 2022.

11. Goodwill:

	December 30, 2017	September 30, 2017 *	December 31, 2016
	\$	\$	\$
Balance, beginning of period	320,130	229,952	229,952
Adjustment of prior year purchase price allocation	-	(3,098)	-
Additions through business combination	17,781	93,276	-
Balance, end of period	337,911	320,130	229,952

*Includes adjustment of prior year purchase price allocation (See Note 4)

ROGERS SUGAR INC.

15

Notes to unaudited condensed consolidated interim financial statements
(In thousands of dollars except as noted and amounts per share)

11. Goodwill (continued):

Recoverability of cash generating units (“CGU”):

For the purpose of impairment testing, goodwill and intangibles with indefinite useful life are allocated to the Company’s operating segments, which represent the lowest level within the Company at which the goodwill and intangibles are monitored for internal management purposes, as follows:

	December 30, 2017	September 30, 2017	December 31, 2016
	\$	\$	\$
Sugar:			
Goodwill	229,952	229,952	229,952
Maple products:			
Goodwill	107,959	90,178 *	-
Brand names	3,790	2,410	-
	341,701	322,540	229,952

*Includes adjustment of prior year purchase price allocation (See Note 4)

In assessing whether goodwill and indefinite life intangible assets are impaired, the carrying amount of the segments (including goodwill and indefinite life intangible assets) are compared to their recoverable amount. The recoverable amounts of segments are based on the higher of the value in use and fair value less costs to sell. The Company performed the annual impairment review for goodwill and indefinite life intangible assets during fiscal 2017, and the estimated recoverable amounts exceeded the carrying amounts of the segments and, as a result, there was no impairment identified.

Recoverable amount

The methodology used by the Company to determine the recoverable amount of the sugar and maple segments was based on the fair values less cost to sell (“FVLCTS”).

The fair values of each segment were based on an earnings multiple applied to forecasted adjusted EBITDA for the next year, which takes into account financial budgets approved by senior management. The earnings multiple used was obtained by using market comparables as a reference.

(In thousands of dollars except as noted and amounts per share)

12. Revolving credit facility:

On December 20, 2017, the Company amended its existing revolving credit facility thereby increasing its available credit by \$40.0 million by drawing additional funds under the accordion feature embedded in the revolving credit facility (“Additional Accordion Borrowings”). As a result of the amended revolving credit facility and the Additional Accordion Borrowings, the Company has a total of \$315.0 million of available working capital from which it can borrow at prime rate, LIBOR rate or under bankers’ acceptances, plus 20 to 250 basis points, based on achieving certain financial ratios. Certain assets of the Company, including trade receivables, inventories and property, plant and equipment, have been pledged as security for the revolving credit facility, including some of the assets of LBMT. The maturity date of the amended revolving credit facility is June 28, 2022. A total of \$0.1 million was paid in financing fees.

The following amounts were outstanding as of:

	December 30, 2017	September 30, 2017	December 31, 2016
	\$	\$	\$
Outstanding amount on revolving credit facility:			
Current	87,500	20,000	30,000
Non-current	140,000	150,000	60,000
	227,500	170,000	90,000

As at December 30, 2017, an amount of \$140.0 million is shown as non-current as we don’t expect it to be repaid within the next 12 months.

The carrying value of the revolving credit facility approximates fair value as the borrowings bear interest at variable rates.

13. Other long-liabilities:

14. Convertible unsecured subordinated debentures (continued):

During the first quarter of fiscal 2017, holders of the Fourth series convertible debentures converted a total of \$0.4 million into 65,384 common shares.

The fair value of the Fifth and Sixth series debentures as at December 30, 2017 were approximately \$124.0 million based on market quotes.

15. Share capital and other components of equity:

As of December 30, 2017, a total of 105,743,582 common shares (September 30, 2017 - 105,743,582; December 31, 2016 – 93,995,544) were outstanding.

The Company declared a quarterly dividend of \$0.09 per share for the three month period ending December 30, 2017 and December 31, 2016 amounting to the following:

	December 30, 2017	December 31, 2016
Dividends	\$ 9,517	\$ 8,460
	9,517	8,460

16. Earnings per share:

Reconciliation between basic and diluted earnings per share is as follows:

	For the three months ended	
	December 30, 2017	December 31, 2016
Basic earnings per share:		
Net earnings	\$ 20,216	\$ 13,552
Weighted average number of shares outstanding	105,743,582	93,868,140
Basic earnings per share	\$ 0.19	\$ 0.14
Diluted earnings per share:		
Net earnings	\$ 20,216	\$ 13,552
Plus impact of convertible unsecured subordinated debentures and share options	1,281	1,315
	\$ 21,497	\$ 14,867
Weighted average number of shares outstanding:		
Basic weighted average number of shares outstanding	105,743,582	93,868,140

(In thousands of dollars except as noted and amounts per share)

17. Share-based compensation:

(a) Equity-Settled Share-Based Compensation:

The Company has reserved and set aside for issuance an aggregate of 4,000,000 common shares (September 30, 2017 – 4,000,000 common shares; December 31, 2016 – 4,000,000 common shares) at a price equal to the average market price of transactions during the last five trading days prior to the grant date. Options are exercisable to a maximum of 20% of the optioned shares per year, starting after the first anniversary date of the granting of the options and will expire after a term of ten years. Upon termination, resignation, retirement, death or long-term disability, all share options granted under the Share Option Plan not vested shall be forfeited.

On December 4, 2017, a total of 1,065,322 share options were granted at a price of \$6.23 per common share to certain executives and senior managers.

During the first quarter of fiscal 2017, a total of 360,000 shares options were granted at a price of \$6.51 per common share to certain executives. In addition, during the first quarter of 2017, a total of 80,000 common shares (December 30, 2017 – nil; September 30, 2017 – 96,500 common shares) were issued pursuant to the exercise of share options under the Share Option Plan for total cash proceeds of \$428 (December 30, 2017 – nil; September 30, 2017; \$521), which was recorded to share capital as well as an ascribed value from contributed surplus of \$23 (December 30, 2017 – nil; September 30, 2017; \$28).

Compensation expense is amortized over the vesting period of the corresponding optioned shares and is expensed in the administration and selling expenses with an offsetting credit to contributed surplus. An expense of \$34 was recorded for the three months ended December 30, 2017 (an expense of \$11 for the three months ended December 31, 2016).

The following tables summarize information about the Share Option Plan as of December 30, 2017:

Exercise price per option	Outstanding number of options at September 30, 2017	Options granted during the period	Options exercised during the period	Options forfeited during the period	Outstanding number of options at December 30, 2017	Weighted average remaining life	Number of options exercisable
\$4.59	830,000	-	-	-	830,000	7.40	320,000
\$5.61	80,000	-	-	-	80,000	4.20	80,000
\$6.23	-	1,065,322	-	-	1,065,322	9.92	-
\$6.51	360,000	-	-	-	360,000	8.92	72,000
	1,270,000	1,065,322	-	-	2,335,322	n/a	472,000

Options outstanding held by key management personnel amounted to 2,335,322 options as at December 30, 2017 and 1,270,000 options as at September 30, 2017 (see note 19).

17. Share-based compensation (continued):

(a) Equity-Settled Share-Based Compensation (continued):

The measurement date fair values were measured based on the Black-Scholes option pricing model. Expected volatility is estimated by considering historic average share price volatility. The inputs used in the measurement of the fair values of the share-based payment plans granted in the first quarter of fiscal 2018 are the following:

Total fair value of options	\$373
Share price	\$6.31
Exercise price	\$6.23
Expected volatility (weighted average volatility)	16.194% to 17.640%
Option life (expected weighted average life)	4 to 6 years
Expected dividends	5.71%
Weighted average risk-free interest rate (based on government bonds)	1.647% to 1.760%

(b) Cash-Settled Share-Based Compensation:

i) Share Appreciation Rights ("SAR"):

During the first quarter of fiscal 2017, a SAR plan was created under the existing Share Option Plan that entitle the grantee to a cash payment based on the increase in the share price of the Company's common shares from the grant date to the settlement date. During the first quarter of fiscal 2017, a total of 125,000 SARs were granted at a price of \$6.51 to an executive.

Compensation expense is amortized over the vesting period of the corresponding optioned shares and is expensed in the administration and selling expenses with an offsetting credit to liability. An expense of \$3 was recorded for the three months ended December 30, 2017 (an expense of \$2 for the three months ended December 31, 2016). The liabilities arising from the SARs as at December 30, 2017 were \$19 (September 30, 2017 – \$15; December 31, 2016 – \$2).

The following table summarizes information about the SARs as of December 30, 2017:

Share price per unit	Outstanding number of units at September 30, 2017	Units granted during the period	Units exercised during the period	Units forfeited during the period	Outstanding number of units at December 30, 2017	Number of units exercisable
\$6.51	125,000	-	-	-	125,000	-

The measurement date fair values were measured based on the Black-Scholes option pricing model. Expected volatility is estimated by considering historic average share price volatility. The inputs used in the measurement of the fair values of the SARs granted in the first quarter of fiscal 2018 are the following:

ROGERS SUGAR INC.

21

Notes to unaudited condensed consolidated interim financial statements
(In thousands of dollars except as noted and amounts per share)

17. Share-based compensation (continued):

(b) Cash-Settled Share-Based Compensation (continued):

i) Share Appreciation Rights ("SAR") (continued):

Options granted December 5, 2016	Grant date	Measurement date as at December 30, 2017
Total fair value of SARs	\$53	\$40
Share price	\$6.63	\$6.32
Exercise price	\$6.51	\$6.51
Expected volatility (weighted average volatility)	16.520% to 18.670%	15.937% to 17.085%
Option life (expected weighted average life)	2 to 6 years	2 to 6 years
Expected dividends	5.43%	5.70%
Weighted average risk-free interest rate (based on government bonds)	0.740% to 1.160%	1.773% to 1.997%

The expected volatility reflects the assumption that the historical volatility over a period similar to the life of the SARs is indicative of future trends, which may not necessarily be the actual outcome.

ii) Performance Share Units ("PSU"):

During the quarter, a PSU plan was created for executives with an aggregate of 224,761 PSUs having been granted by the Company and remained outstanding as at December 30, 2017. These PSUs will vest at the end of the 2017-2020 Performance Cycle based on the achievement of total shareholder returns set by the Human Resources and Compensation Committee ("HRCC") and the Board of Directors of the Company. Following the end of a Performance Cycle, the Board of Directors of the Company will determine, and to the extent only that the Vesting Conditions include financial conditions, concurrently with the release of the Company's financial and/or operational results for the fiscal year ended at the end of the Performance Cycle, whether the Vesting Conditions for the PSUs granted to a participant relating to such Performance Cycle have been achieved. Depending on the achievement of the Vesting Conditions, between 0% and 200% of the PSUs will become vested.

The Board of Directors of the Company has the discretion to determine that all or a portion of the PSUs granted to a participant for which the Vesting Conditions have not been achieved shall vest to such participant.

The value to be paid-out to each participant will be equal to the result of: the number of PSUs granted to the participant which have vested, multiplied by the volume weighted average closing price of the Common Shares on the Toronto Stock Exchange (the "TSX") for the five trading days immediately preceding the day on which the Company shall pay the value to the participant under the PSU Plan, and such date will in no event occur after December 31 of the third calendar year following the calendar year in which the PSUs are granted.

17. Share-based compensation (continued):

(b) Cash-Settled Share-Based Compensation (continued):

i) Performance Share Units (“PSU”) (continued):

An expense of \$100 was recorded for the three months ended December 30, 2017 (September 30, 2017 – nil; December 31, 2016 – nil) in administration and selling expenses with an offsetting credit to liability. The liabilities arising from the PSUs as at December 30, 2017 were \$100 (September 30, 2017 – nil; December 31, 2016 – nil).

18. Supplementary cash flow information:

	December 30, 2017	December 31, 2016	September 30, 2017	October 1, 2016
	\$	\$	\$	\$
Non-cash transactions:				
Additions of property, plant and equipment and intangibles included in trade and other payables	1,598	1,211	247	135
Investment tax credit included in income taxes payable	-	-	-	220

19. Key management personnel:

The Board of Directors as well as the President and all the Vice-Presidents are deemed to be key management personnel of the Company. The following is the compensation expense for key management personnel:

	For the three months ended	
	December 30, 2017	December 31, 2016
	\$	\$
Salaries and short-term benefits	656	981
Attendance fees for members of the Board of Directors	230	131
Post-retirement benefits	35	35
Share-based compensation	34	11
	955	1,158

Further information about the remuneration of individual directors is provided in the annual Management Proxy Circular.

ROGERS SUGAR INC.

23

Notes to unaudited condensed consolidated interim financial statements
(In thousands of dollars except as noted and amounts per share)

20. Personnel expenses:

	For the three months ended	
	December 30, 2017	December 31, 2016
	\$	\$
Wages, salaries and employee benefits	22,112	18,970
(Income) expenses related to defined benefit plans ⁽¹⁾	(368)	1,224
Expenses related to defined contributions plans	759	753
Share-based compensation	34	11
	22,537	20,958

- (1) On October 16, 2017, the Alberta Treasury Board and Finance approved an amendment to the Alberta Hourly Plan which led to the elimination of the reserve for future supplements, and investment earnings accumulated thereon, effective January 1, 2017. As a result, during the quarter, a \$1.5 million pension income was recorded.

The personnel expenses were charged and capitalized to the unaudited condensed consolidated interim statements of earnings and statements of financial position, respectively, as follows:

	For the three months ended	
	December 30, 2017	December 31, 2016
	\$	\$
Cost of sales	17,423	17,505
Administration and selling expenses	4,644	3,055
Distribution expenses	357	346
	22,424	20,906
Property, plant and equipment	113	52
	22,537	20,958

21. Segmented information:

The Company has two operating and reportable segments, sugar and maple products. The principal business activity of the sugar segment is the refining, packaging and marketing of sugar products. The Maple products segment processes pure maple syrup and related maple products. The reportable segments are managed independently as they require different technology and capital resources. Performance is measured based on the segments' gross margins and results from operating activities. These measures are included in the internal management reports that are reviewed by the Company's President and CEO, and management believes that such information is the most relevant in the evaluation of the results of the segments.

Transactions between reportable segments are interest receivable (payable), which are eliminated upon consolidation.
